Division Cover-Up

Materials: Division Cover-Up Board

Division spinner

Counters or Tiles

1. On the Division Cover-Up board, write the numbers 3, 4, 5, 6, 7, 8, and 9 in any order that you wish. You may use each number as many or as few times as you wish. Be sure you have a number in each blank square.
2. Use a pencil and a paper clip to spin the Division Spinner.
3. Solve the division problem on the spinner.
4. Cover the quotient on the board. If the quotient is on the board more than once, choose which one you wish to cover. If the quotient is not on the board, you lose your turn.
5. The first person to cover five squares in a row wins the game.
6. If you wish, you may also play to cover the entire board (blackout) or to cover the outside squares (picture frame).
