

Lights out Lunch

Sample PA Announcement

Week of Campaign

This week our school is going to be participating in a Lights Out Lunch event on [insert day] as part of the **Energy Cup Challenge**. We are going to be turning off the lights in the [insert location(s)] to remind and encourage everyone to turn off the lights when they are not needed. We will be joining other schools across NLPs who are also choosing to enjoy their lunch with the lights off. If all schools participated in this activity every school day, we would save enough electricity to watch TV for over 50 years straight! We look forward to a natural light filled lunch with everyone.

Day of Campaign

Today at lunch, dining by natural light is on the menu. As part of the **Energy Cup Challenge** we will be turning off the lights in the [insert location(s)] today to raise awareness about energy conservation. We are excited about joining others schools across the District who are coming together to save energy by holding their own **Lights Out Lunch** event. We hope everyone will take the time to think about taking advantage of more natural light in their classrooms and other areas of the school by remembering to “turn off the light when outside is bright”.
