

# TECHNOLOGICAL PROCESS FOR STOP MOTION

(indicate the name of your project,  
for example : Jaime Invaders)

Name:

Class:

Date:

## **1. Description of the Stop Motion:**

With as much clarity as possible, describe the characteristics of the technological problem you must solve. Accompany the text with the sketches you think are appropriate.

## **2. Search for information:**

It may be useful to search the Internet, to use specialized books or magazines, to look at catalogs from manufacturers, or to ask people who are experts in the subject. Insert all of the information you find here: notes you have taken, texts, images, sketches, catalog pages, etc.

You can copy and paste your ideas from the Internet.

**3. Planning.**

Before going into the workshop to build your design, you need to plan out what you will do there along with the materials and tools you will need.

**3.1. List of materials**

| Materials sheet |                      |        |
|-----------------|----------------------|--------|
| Material        | What is it used for? | Amount |
|                 |                      |        |

**3.2. List of tools**

| Tools sheet |                      |
|-------------|----------------------|
| Tool        | What is it used for? |
|             |                      |

3.3. Sequence of operations: Story board

|            |         |
|------------|---------|
| Séquence : | Plans : |
|------------|---------|

|  |               |
|--|---------------|
