 [firstname] from raw data to instant insights — see it live in the Webinar
 [firstname] stop reading spreadsheets — just ask & get answers
 [firstname] AI that turns scraped data into instant business decisions
 [firstname] webinar: How to chat with your data (no analyst needed)
 [firstname] Ask. Answer. Act. Data insights made effortless, launching soon

Mail:

Hi [firstname],

Getting the data is just half the battle. The real challenge? Figuring out what it actually means.

Most scrapers leave you with massive spreadsheets that take hours to read and analyze.

With Diggy Miner AI, that problem disappears.

Here's how it works:

- ✓ Ask simple questions — Which competitor has the lowest price? Which products have the best reviews?
- ✓ Chat directly with your scraped data — like messaging a human data analyst.
- ✓ Discover hidden trends — insights that used to require an expensive data scientist.
- ✓ Act instantly — no time wasted on manual number-crunching.

 Imagine scraping thousands of product listings, then simply asking:

“Which ones have discounts over 20%?”

...and getting the answer in seconds.

Join the live webinar and watch Diggy Miner AI turn raw scraped data into instant answers:

 17 1st Session: 20 August, 8PM ET OR

 17 2nd Session: 21 August, 10AM ET

You'll see:

- How to scrape any website in one click.
- How to instantly interrogate your scraped data for insights.
- A live Q&A with Diggy Miner AI — yes, you can literally chat with your data.

 Pre-launch subscribers get early access + a one-time deal you'll never see again.
