

Hey there! I'm Chisekai 😊 Here's a little information to refer to when you see my reviews on skincare/makeup or are curious about how it would work on you in relation to my shade!

Personal Color: Autumn Deep

Undertone: Warm (warm 2) (out of 3) ya girl is yellow lmao

Skin Shade: Light-Medium range

Korean shade: 23 - 24 WARM (Most no. 23 cushions work for me, especially when they oxidize after time or when I use a powder that has color to it to even it out).

Skin type & Concerns:

- slightly sensitive, but very acne-prone oily skin! (This means that although most products don't cause irritation/rawness or redness, I do end up getting acne often with the wrong products or habits! My acne is mostly hormonal these days tho)
- Some months I tend to lean on the combination type where my cheeks don't get oily but my t zone does, but for the most part I'm an oily dehydrated girl
- I have a bit of hyperpigmentation, so I gravitate towards products targeting removing them!
- I do have visible pores that annoy me so I like tightening the visual appearance as well
- I have dark circles, but they're not so prominent, but I still use eyecreams
- I live in a tropical country, so it is always HOT and HUMID, so my morning skincare routine is light and breathable.
- I have a lot of box/pick/rolling pitted acne scars :(probs my current worst concern, but I don't think skincare alone can help that, and I plan to get microneedling or Laser sessions to address this in the future when I can afford it!

Makeup Preferences:

- I have a lot of box/pick/rolling pitted acne scars, so I tend to gravitate towards more matte or satin looks, as dewy ones tend to exaggerate them unless I work hard to skin prep and prime every single day but who has the time for that huhu (also it's hot where I live)
- Although I'm an autumn girly I still like glossy lips huhu but I try to choose products that don't make it look awkward on me or I place my gloss in the center of my lips only!
- I don't go heavy on colors but I do like my glitters and shimmers on the eyes! I mostly do daily wearable looks so I can't help you with bold looks that play with colors
