Meta Title: EMface | Instant Facelift | Wellnessesity | Wyckoff, NJ

Slug: /emface-wyckoff-nj/

Primary Keyword: EMface

Secondary Keyword: Instant Facelift

Meta: BTL released EMface, a novel facial toning solution that provides an instant facelift without surgery or downtime. Try it at Wellnessesity in Wyckoff, NJ.

Instant Facelift with EMface | Wyckoff, NJ

BTL's newest aesthetic treatment, EMface, is getting a lot of attention right now. It is the first and only way to achieve an instant facelift without surgery. This revolutionary device gives a youthful appearance with no needles, fillers, toxins, or recovery time. EMface uses advanced RF and HIFES technology to diminish wrinkles and restore facial definition. In addition, it triggers the body to make more elastin and collagen. Both of these substances are important for healthy, luminous skin.

Has the thought of painful surgery prevented you from getting a facelift? Now, there is a perfect solution. EMface patients observe a vibrant complexion with no downtime. Experience it for yourself at Wellnessesity in Wyckoff, NJ. Call 201-347-9599 to kick start your journey to lifted, tightened skin.

Benefits of EMface

- FDA-cleared as effective and safe
- Provides an instant facelift
- No toxins, fillers, or needles
- No recovery time
- Natural-looking outcome
- Diminishes wrinkles and fine lines
- Tones the face
- Restores volume in loose skin
- Easy 20-minute sessions
- Encourages elastin and collagen production

EMface Before and After*

As you research non-surgical facelifts, you may wonder what kind of results you can get from EMface. Our clients' before and after pictures demonstrate phenomenal results. Each person looks more youthful. Their faces look plumper and more defined after the procedure. As with any cosmetic treatment, results vary per patient.* Pick a respectable provider to perform this treatment for the best outcome.

INSERT BAS

How EMface Works

EMface is a groundbreaking device that uses radiofrequency (RF) energy to revitalize the face. It smooths out wrinkles and creases, tones facial muscles, and provides an overall lifted look. If you are in the market for facial toning and sculpting sans surgery, try EMface. The RF energy works with HIFES to boost elastin and collagen production in the body.

EMface Treatment Areas

EMface is a versatile device that can lift the entire face:

- Around the eyes
- Brows
- Forehead
- Neck
- Chin
- Jawline

EMface Results

Most of our patients love their EMface results. Over 90% of people reported noticing an improved appearance following their sessions. They observe:

- 23% more lift in the face
- 26% more elastin and collagen
- 30% more muscle tone in the face
- 37% fewer creases, lines, and wrinkles

The majority of EMface patients only require four sessions to see incredible results. But it usually takes 6-12 weeks for full results to manifest. Just like with any aesthetic treatment, individual results vary.*

What Is EMface Cost

The cost of EMface differs per person depending on various factors like skin condition and individual expectations. Discover how much this non-invasive facelift will be for you by visiting Wellnessesity or calling 201-347-9599. Share your aesthetic goals, and we can assess your skin and needs. After determining your candidacy, we can move forward to create an effective treatment plan within your budget.

EMface vs Surgical Facelift?

Before BTL introduced EMface, people would have to get surgery if they wanted a facelift. While invasive facelifts are effective at improving one's face and tightening the skin, they come with drawbacks. For example, surgery requires needles, anesthesia, and an excruciating recovery. To top it off, some end up with permanent scars and post-procedure complications.

Today, it is possible to look more youthful without going through all this hassle. EMface is a safe, effective, and non-surgical alternative for face lifting. Since the session only lasts for 20 minutes, patients can book their appointments during their lunch breaks.

Additional EMface FAQs

When Are EMface Results Apparent?

EMface is perfect for people who love instant gratification. Clients see noticeable improvement after one session, but we recommend several sessions in a 6 to 12-week period for the best outcome. Each person will need a different number of treatments depending on their cosmetic expectations.

Can I Use EMface to Sculpt My Chin?

Many people turn to EMface to define their chin and jawline. The device has muscle-contracting technology that strengthens and tones muscles in the face. After the session, patients enjoy a snatched jawline and attractive profile.

Can I Lift My Eyes with EMface?

It is common for people to get a “lateral eye lift” with EMface. So yes, you can get an eye lift with no needles, surgery, or downtime!

Can I Use Cosmetic Fillers With EMface?

Numerous clients use cosmetic fillers with EMface. Book a consultation with us to learn how you can safely use both.
