

SHIFT Festival Fire Policy

*This comes directly from the [“Things to Know”](#) guide on our website. Be sure you are intimately familiar with it!

SHIFT is held in a desert in July! Staying fire-free is our #1 priority. Read this section 5 times! (we are serious).

DO NOT EVER throw cigarettes (or anything!) out of your window on your way to the event. Be ready to ash your cigarettes inside your vehicle!

DO NOT pull over into tall grass on your way to the event site or at it. When you do pull over, watch your car to make sure no fires are starting.

No open flames, no wood burning, no candles, no incense. No exceptions.

Drive only on mowed areas; do not drive off designated lanes.

Do not idle your vehicle *at all!* If you pull over on the drive out or on the event site, immediately turn your vehicle off.

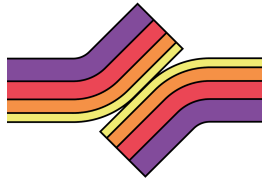

Do not go in the tall grass, even inside the festival site.

ALL smoking (yes, even marijuana flower) must be in designated smoking areas *only*. **This will be enforced.** If you are a smoker, consider vaping for the weekend of the festival. *People found smoking outside of designated areas will have their wristbands cut and be asked to leave the event. Smoking areas will be shown on the event map and marked with signs on site.*

Camp stoves are OK *if elevated at least 3 ft from the ground* or inside RVs, campers, and trailers!

Fire pits are allowed in the camping area only if they are standard, unmodified, propane-based fire pits. They must be placed on a piece of plywood. **This will be enforced.**

Have a modified fire pit? Want to bring your propane-based art to SHIFT? [Fill out the Art Application](#). All fire art is subject to approval pre-event and checked for safety by the SHIFT fire safety team at the event. ****You are required to provide your own fire extinguishers.****

FIRE SPINNING RULES:

- No fire spinning outside of designated areas: you'll have space adjacent to the main stage. Look for the lit-up fire circle.
- SHIFT will provide a fuel depot and dip station. If you bring fuel please leave it in the fuel depot where it can be safely managed.
- SHIFT will provide safeties, but please check in and have a safety assigned to you before you spin.
- SHIFT will provide duvies, water, and fire extinguishers.
- Please check in with the fuel depot before spinning to have your props checked out for safety.
