

Choose any 2:

Prezi - must include a picture of the model and it must be labeled (including charges where applicable), also must have answers to all research questions (listed on my website)

3-D Model - must be labeled, including charges (directly on 3-D Model or a separate, detailed skill), can be edible

Video - Be creative, perhaps a commercial for your scientists "new model", an interview, or a Brain Pop

Live Skit - similar to a video, but it's live!

Scrapbook/Collage - cannot be in a digital format, must be tangible, like an actual collage or scrapbook - no writing is required, other than labels, must include 3 photos for each of the 5 models
