

CaveGameArchive

CaveGameArchive

Video 1 “Upcoming 1/ 5” (now called “Underground 1/ 3”)

- first thing i noticed is the weird screen crop covering the users hotbar and username.
 - “fd, fdsa, fd, fads, fdas, fds, fads, afds, fads, f, dsa, fd, afds, fds, fads, fads, fads, fads, fd
- fds, fds” Can't find any sort of actual meaning to this.
- Introduced to other player named JEt325
 - weird thing with the iron sword
 - Owner of the channel leaves a comment on video “I’m sorry JEt”
 - The perspective we see is the owner of the channel, although still nameless we can refer to them as “CaveGameArchive”(CGA)
 - CGA has presumably done something worth apologizing to JEt, who we see playing on a server with him.

Video 2 “Upcoming 3/ 5”

- CGA is playing Minecraft 1.21.4 in a LAN world.
- What is the point of the TNT?
- a small frame shows that JEt left between part 1/3 and part 3/3*
- We can tell CGA hasn't left the world since part 1/ 5 but also has progressed tremendously since the first video. Which raises the question: where is 2/ 5?
- Random beds placed on the ground and in a tree?
- One single oak log missing from a tree?
- Comment from CGA "your welcome JEt"

Video 3 “11-21-2011.avi”

- No sound? CGA finally notices this around 00:40 we see him play with his sound controls to try and fix it.
- The title suggests this was recorded in 2011, meaning it can't possibly be the same world we have seen in the last 2 videos.. This is further evidenced by the change in (what is presumably) CGA's skin back to Steve from what it was in Video 2.
 - Sidenote: this is also backed by the fact that CGA received iron ore Blocks as opposed to chunks of iron ore in the cave at 01:12.
- Paranoia?
 - Why loop through the cave again?
- Pitch black doorway at 03:40
- Same weird shadow glitches through the ravine around 04:40.
 - Will point out that if the player is on a much earlier version of minecraft, shadow and lighting bugs were common. And doesn't necessarily confirm any sort of maliciousness to the world. Although the way CGA avoids the shadows is unsettling.

Video 4 “Corrupted file.jpg”

- okay right away .jpg is an image format. Meaning this video is not the “corrupted file” in question.

- yay we have sound back.
- CGA made a lot of progress from the last video if this is indeed the same world.
- We finally get CGA's username koolman420 which confirms he is the same player from [Video 1&2](#). I will go through and Highlight any mention of his name now with yellow to signify that he is the same person.
- We see 3 signs.
 - The first in the foreground says "is anyone in this world?" which koolman elaborates on later saying he thinks someone may be in his world. But he doesn't know for sure
 - The second in the distance of the first sign says "no..."
 - The third you see as he's walking back into his base says "NULL"
- We see another sign after he walks away from his base saying "die, null is coming"
 - who is null?
- 01:35 we see a broken sign to the left of the screen and shortly after, another tree with one single log missing.
- 02:08 Another sign that says "this version is outdated"
- A proposition could be that there are 2 people editing the signs, one warning him and the other "scaring" him.
- this can be backed up by the NULL entity having 2 separate names: NULL and 000000

Video 5 "chill"

- koolman has his skin back.
- just looks around at signs for 1 minute and 30 seconds. Most of the signs are the same except "-6khWD4i6mA"
- is he afraid to look directly at the signs or something?
- Desc has "v=-6khWD4i6A" which is almost identical to the sign, think koolman typoed there ngl.

Video 6 " "

- Starts back in modern MC. and goes into a cave. We see a 2x1 cobblestone patch that he seems to miss the first time.
- Koolman notices the patch and goes to break it.. And when he does he teleports- back to the swamp with the signs. Except there's no house, no signs, nothing. And then he starts building the house we've already seen in previous episodes.
- Also in the modern minecraft version portion of this video- we see koolman has the steve skin, and as soon as he's teleported to the old version he has his normal skin back.
- This video clearly splits the Series into 2 worlds Modern and Past i will go through and highlight the video titles through the document to help keep them separate.
- This video also hints at the importance of whichever skin we are seeing koolman use.
- subtitles we get a playlist link as koolman randomly falls out of the world.
- https://www.youtube.com/playlist?list=PLDggOrMgZ7boVxbnKR_D1eMlNFxtri-KQ
- This same playlist link can be found in the top left corner of the post titled "House almost done!" in the posts tab of the cavegamearchive channel.

Video 7 "I'm Aware"

-This upload is literally Koolman going through the slides of a presentation he made about the occurrences in his world(s?). The link to this presentation can be found both in the description of the video and in the "Posts" tab of his channel.

https://docs.google.com/presentation/d/1lduBxpf4yvhiJ0PFKrShvEO_BHMrqJhPI0DIwV5WyuY/edit?slide=id.g3468983794b_0_38#slide=id.g3468983794b_0_38

-The only thing I found of interest in this presentation was the clip of him dying in the untitled video ([Video 6](#)). In the original video we see him die and look up toward the bedrock, hovering his cursor on the respawn screen. But in the presentation we see weird distortion effects, and a lightning strike?

-This obviously indicates the video has been tampered with so ill download the video and see if i can find anything hidden. Will report back to this thread of notes when done.

Other Channel Changes from 3.31.25

-New Profile Picture of the 2x1 shadow we see in [Video 3](#).

-New channel banner "it's not done yet" which is a common phrase we've seen in the desc. Of multiple videos so far.

-I messed around with levels and stuff in a photo editor, nothing hidden.

-And a nice new description, "It's slowly forming. Its gonna take over. It's slowly forming. Its gonna take over. It's slowly forming. It's gonna take over." (repeats 23 times)

-My first thoughts on this are the shadows or black blocks forming and taking over? Just an idea for now.

-A couple new uploads in the "posts" section but seems to all be images weve already seen. And nothing hidden was found (at least by myself).

-It's also worth noting that the titles of [Video 1](#) and [Video 2](#) have changed. They went from "Upcoming" to "Underground", and from fractions of "5" to fractions of "3".

Playlist - "ACT ?"

Video 1 "000000"

-Text in chat from a player called "000000" says "hi s [REDACTED]" the rest is blurred on video.

-sign in the top corner of the house says "he's here" I think we can conclude from this that "000000" is "NULL".

- we see the player "000000" in the distance through the door before koolman breaks the sign and quits the game

-I also want to point out that the swamp house is now complete again. I can't tell if the videos are all out of order chronologically or if there is some sort of "time loop" happening.

Video 2 "Mine Craft Alpha Failed Test"

-makes a completely new alpha 1.0.4 world and barely loads in before it crashes.

-The crash report appears to be normal? Can't tell because the bottom half is blurred out.

KoolMan420

Koolman420-h3n

Video 1 “unused file”

- Literally 4 minutes of normal minecraft gameplay.
- Couldn't find literally anything.

Shorts 1 “cave game 1”

- also nothing to note besides he's playing at about .23 fps.

April 5, 2025 (Jet_342)

April 5, 2025 (Jet 342)

First of all Jet is obviously aware of the RGN group taking interest in his story. And he doesn't necessarily appear to be happy about it.

But that really appears to be the only thing ARG related for now. He states he used to post in 2011, so who knows what kind of gold mine of lore he has unlisted currently. But for now we just wait, I suppose.

Jet and Koolman 420

Jet and Koolman 420

Shorts 1: "K"

- Set around Christmas time
- Word "no." is rubbed out on drawing app on chromebook, and replaced with "Yes."
- "Please leave me alone..." is written shortly after, then the short ends.*
- We can infer that Koolman is the one who is writing on the chromebook, and he is trying to communicate with someone?*
- "No" may have been written by someone else.*
- Person talking to Koolman may be Null (000000)*

Shorts 2: "z"

- First short with audio!
- Happens shortly after "K".
- Koolman explains that he thinks somethings living in his computer.
- After opening his computer up, he is met with the message "Why would I do that?"
- Video ends afterwards
- We now know that Koolmans name is Landon B-----r
- The new message may be a direct answer to his first question, meaning the "thing" in his computer wont leave him alone.*
- This "thing" may be the 000000 entity that won't leave him alone.*

Shorts 3: "VID"

- Koolman writes a new message "just please"
- He explains that he doesn't know what is in his computer
- He closes the laptop and the video ends.
- The message displayed is most likely a response to the message from the last video.*
- Koolman is desperately pleading with the thing to leave it alone.*
