

Night Light - by David Hill

Walt: build comprehension skills by answering a range of questions about a text. To understand different types of questions.

Answer the questions underneath in a **DIFFERENT COLOUR**, please.

Types of Questions

Literal (L) = the answer is in the text.

Reorganisation (R) = the answer is in different places in the text

Inference (I) = the answer is suggested and we have to find the clues

Vocabulary (V) = the answer is about the meaning of words

Evaluation (E) = the answer needs us to bring different ideas together

1]. How far away is the moon from Earth? (L)

A]. 380,000km

2]. Why is gravity called the 'Invisible force'? (I)

A]. It is an invisible pull (force)

3]. What does diameter mean? (V)

A]. It's width through the middle from side to side

4]. Why does it look like the moon changes shape? How does this happen? (R)

A]. We can only see the part that is reflected from the sun, this changes as the moon and earth rotate.

5]. What is one way gravity and the moon affect our Earth? (I)

A]. It causes our tides

6]. What does the word *meteorites* mean? (V)

A]. Pieces of rock or metal that have fallen from outer space

7]. Why does the moon appear to be smaller? (E)

A]. It is a waning moon

8]. Why is one side of the moon always hidden from us? (I)

A]. Because it is directly in between earth and the sun

9]. What is a 'King Tide'? (I)

A]. When the moon and the sun are in line their gravity causes large tides.

10]. What will happen in a billion years? (I)

A]. The moon will be the size of a star
