Abstract

The abstract should be a concise (maximum 500 words) and informative summary of the scientific paper, providing readers with an overview of the study's purpose, methods, results, and conclusions. It serves as a crucial element to help readers quickly understand the content and relevance of the research without having to read the entire paper. Briefly describe the context and background of the study, summarize the research design and methodology, and highlight the key findings, outcomes, the importance, originality and significance of your research without including citations or references.

Keywords

Please list up to ten keywords (separated by coma ',') that best represent the manuscript's content.

1. Introduction

We welcome submissions of original research articles, review papers, systematic literature reviews, meta-analyses, essays, short communications, reproductions and replications of analyses and applied experiments (independent evidence for or against the conclusions of a published paper), case studies and practical software exercises (containing step-by-step procedures, frameworks, codes and algorithms to generate the results) that align with the mission and scope of Socioeconomic Analytics. Before submitting your manuscript, please carefully review and follow the instructions below:

Manuscript Preparation: Manuscripts should be prepared according to the formatting style instructions for the journal (e.g., font, font size, line spacing, headings and subheadings, references, figures and tables). Please ensure that your manuscript is written in clear and concise English and is free of grammatical and spelling errors and typos.

Manuscript Type: Please indicate the manuscript type (e.g., original research article, review paper, short communication or case study) in the cover letter.

Originality: Manuscripts must be original and not published or under consideration for publication elsewhere.

2. Section X

Authorship: All authors should have made substantial contributions to the research and writing of the manuscript and should approve the final version of the manuscript for submission. Authors cannot be modified (inclusion or exclusion) after approval of the article for publication. Authors must certify that this procedure was duly completed during submission.

2.1. First Subsection

Conflict of Interest: Authors should disclose any potential conflicts of interest that may have influenced the research or writing of the manuscript.

Ethical Standards: All research involving human or animal subjects should follow appropriate ethical standards, and authors should include a statement of compliance in the manuscript.

Submission Process: Manuscripts should be submitted through the journal's online submission system using the Open Journal Systems (OJS). Please create an account if you do not already have one, and follow the instructions for submitting your manuscript.

Cover Letter (Optional): Please include a cover letter that provides a brief overview of the research question(s), methods, results, and implications of the manuscript. Please also include a statement indicating that the manuscript has not been published or submitted elsewhere.

Peer Review: All submissions will undergo a peer-review process, and authors will be notified of the decision within a reasonable time frame. Please note that revisions may be required before a final decision is made.

2.2. Second Subsection

The following formatting style instructions should be followed by all authors submitting manuscripts to Socioeconomic Analytics:

Font: Times New Roman. Font Size: 12.

Layout: Choose A4 format for output on the custom paper size (21 cm * 29.7 cm).

Line Spacing: Single-line spacing throughout the manuscript, including the abstract, text, references, and footnotes.

3. Section Y

Margins: 1-inch margins on all sides of the page.

Page Numbering: All pages should be numbered sequentially, starting with the title page (following the template example).

Title Page: The title page should include the manuscript title, the author(s) name(s), affiliation(s), and email address(es). Please indicate the corresponding author with an asterisk.

4. Section Z

Figures and Tables: All figures and tables should be numbered sequentially and referenced in the text. Please ensure that all figures and tables are of high quality and can be easily read.

4.1. First Subsection

Headings and Subheadings: Please use a clear and consistent heading hierarchy with no more than three levels of headings. Use font size 14 for headings and subheadings in bold and italics to distinguish between the different levels.

Figures and Tables: All figures and tables should be numbered sequentially and referenced in the text. Please ensure that all figures and tables are of high quality and can be easily read.

Equations: Equations must be presented between parentheses with alignment to the right and sequentially in the body of the text.

Footnotes: Footnotes should be used sparingly and kept to a minimum. If used, please ensure that they are numbered sequentially and referenced in the text.

By submitting a manuscript to Socioeconomic Analytics, authors certify that they have read and agree to the authorship criteria and have fulfilled the requirements for authorship as outlined above. The corresponding author is responsible for ensuring that all co-authors have approved the final version of the manuscript and have agreed to be listed as co-authors. We appreciate your adherence to these authorship guidelines, as they are important for maintaining integrity and transparency in research and publishing.

Acknowledgements

The Acknowledgements section of a scientific paper is a space where authors express their gratitude and recognition to individuals, institutions, or organizations that contributed to the research or the writing of the paper. It is a way to acknowledge the support, assistance, and valuable contributions of various people and entities that might not qualify as co-authors but have nonetheless played a role in the research or the publication process. Here are some typical elements to include in the Acknowledgements section: Funding Sources, Individual Contributions, Laboratory or Institution Support, Participants or Subjects, Data or Materials Providers, Language or Editing Assistance, Supportive Family and Friends.

Conflict of Interest Declaration

If any of the authors have potential conflicts of interest that could be perceived as biasing the research, disclose these conflicts in this section. In case of no conflicts to report, please include the following statement: “The authors have no conflicts of interest to declare. All co-authors have seen and agree with the contents of the manuscript and there is no financial interest to report”.

References

All references should follow the APA (American Psychological Association) style. Please ensure that all references are cited in the text and that the reference list is complete and accurate. References must be numbered in alphabetical order by the last name of the author.
