AP Comp Sci - Reviewing printing and comments

1. Write a program called Pokeball that displays the following output:

```
@@@@@@@
@@@@@@@@@
@@@@@@@@@
@@@@@@@@@
|||||||[""]|||||||
|||||||["....."]|||||||
000000000000000000
0000000000000000
0000000000000000
000000000000
```

2. Place a comment somewhere in your code that reads “This Pokeball graphic can be used in the opening sequence of my Pokemon game, or any time the player needs to catch a wild Pokemon.”
3. What is the output of the following program? (Note: this program contains several comments.)

```
public class Organization {
    public static void main(String[] args) {
        System.out.println("If you want to");
        System.out.println("leave a note for future
programmers");
        System.out.println("in with your code");
        System.out.print("place two slashes, like this // ");
        System.out.println("in front of each line of your
comment);

        System.out.print("Another alternative is to ");
        System.out.println("enclose your comments with");
        System.out.println("/*, but not \\*!");
    }
}
```

4. What file name would you give the program in #3? Why?

5. Find and correct the errors in this program:

```
public SubwayAnnoucement {
    public static void mian (String[] args) {
        System.out.Prntln("Stand clear of")
        System.out.println("the closing doors, please.);
    }
}
```
