

You will need:

A snakes and ladders board

A dice

Two or more players aged over 9 with one counter each

Six cards each with a probability question underneath

How to play:

Just like normal snakes and ladders. Take turns at rolling the dice. But when you roll the dice, instead of moving that amount of spaces you pick up the card with the same number on it. You can only move the spaces on the dice if you answer the question correctly. If you don't you stay where you are. Just like snakes and ladders if you land on a snake's head you go down to the tail. And if you land at the bottom of a ladder you can go up to the top of it.
