

HeadShot Ai Pro: Privacy Policy

Last Updated: 07/02/2024

Data privacy is at the center of the HeadShotAI - pro app. We respect your privacy and we never ask for any unnecessary permission that violates your privacy.

Data collection and storage

1. We do not collect users' personal information like email, phone number, or names. We only collect information like whether the person in the images is male or female for better AI training and image generation.
2. The images provided by you are secured on our storage service hosted on AWS. We use images of your face to generate mesmerizing new images.
3. The images you provide are shared with a 3rd party AI service [astria.ai](#) where new images of you are generated through Artificial Intelligence.
4. The raw images that you share are deleted after 24 hours from our servers.
5. The raw and generated images are deleted after 7 days from the [astria.ai](#) servers. We keep it for a week for your convenience to download the images without losing them or if any error occurred during Image creation.
6. We collect anonymous data including crash reports, and in-app analytics, and analyze them with industry-leading security and privacy-centered 3rd party tools.

Do we share your information?

1. Your images are generated by our 3rd party API partner. And they respect your privacy and delete your images after 7 days which is automated by us at HeadShot AI - Pro App.
