

DEFICHAIN - DFI

Information for listings

DeFiChain is **100% a community project**. Only with joined efforts can we make it to become one of the most significant and most important blockchains in the world. Therefore, it is of utmost importance that each and every community member tries to have DFI listed in wallets, on staking sites, comparison platforms and exchanges. Here is the **info most of these services ask for, so you can just plug and play to help the community grow**. We have to act as a single unit to achieve greatness!

Tipp: When filling out information, use the search function in this document for fast access.

GENERAL INFO

Project Name: DeFiChain

Coin symbol: DFI; since DeFiChain is a separate blockchain, DFI is a coin, not a token.

Tagline / description: "Enabling DeFi on Bitcoin."

Non-profit Foundation: DeFiChain Foundation -> the foundation is only responsible for 3 things:

1. Holding 288,000,000 DFI
2. Holding the domains and trademarks
3. Being a legal counterparty to exchanges and listing sites if necessary

Any other function is executed by the community or the masternodes.

Foundation registration date: 6th Nov 2019

Blockchain Mainnet went live date: May 11th 2020 (Bitcoin's 3rd halving day)

E-Mail: partners@defichain.com

COIN ECONOMICS

Coin symbol: DFI

Nr. of decimals: 8 (like Bitcoin)

Current public price: <https://coinmarketcap.com/currencies/defichain/>

Please briefly describe the technical characteristics of the project and its business model features: Non turing complete smart contract blockchain where DFI is used as "Gas"

Technical details: DeFiChain is a BTC code fork from v.0.18:
<https://github.com/DeFiCh/ain/releases>

Project Launch Date: May 11th 2020 (Bitcoin's halving day)

ICO / IEO: none (there were free airdrops to the community in May 2020)

Early investors: none

First trading day of DFI: June 17th 2020 on: <https://latoken.com/exchange/DFI-BTC>

Price feed:
<https://api.latoken.com/v2/ticker/68f36a57-8a0b-445e-b3f6-1e9f6764ae04/0c3a106d-bde3-4c13-a26e-3fd2394529e5>

Platform: separate open-source blockchain

Chain status: mainnet is live

Chain Fork: BTC v.0.18

Consensus Algorithm: Staking

Traction / Users / Community: approx. 10,000 as of June 2020

Licenses: none needed

App: none / website only as of June 2020

Max Supply: 1,200,000,000 (1.2 billion) as according to the whitepaper:

<https://defichain.com/white-paper/#dfi-token>

Total Supply: <https://api.defichain.io/v1/stats?q=tokens.supply.total>

Circulating supply = coins available to the public:

<https://api.defichain.io/v1/stats?q=tokens.supply.circulation>

Number of coins that are held by the foundation / team: 288,120,000

(<https://api.defichain.io/v1/stats?q=tokens.supply.foundation>; address:

<http://explorer.defichain.io/#/DFI/mainnet/address/dJEbxbfufyPF14SC93yxiquECEfq4YSd9L>)

Complete stats: <https://api.defichain.io/v1/stats> (or) <https://api.defichain.io/v1/stats?pretty>

Rich List: <https://explorer.defichain.com/#/DFI/mainnet/rich-list>

List of DFI exchanges:

Bittrex Global: <https://global.bittrex.com/Market/Index?MarketName=BTC-DFI>

<https://global.bittrex.com/Market/Index?MarketName=USDT-DFI>

Other Exchanges: <https://coinmarketcap.com/currencies/defichain/markets>

List of DFI staking platforms as of Oct 2020:

- Cake DeFi: <https://cakedefi.com>
- Hotbit: <https://www.hotbit.io/invest/detail/304>

Reserve Addresses where coins are not circulating:

<http://explorer.defichain.io/#/DFI/mainnet/address/dJEbxbfufyPF14SC93yxiquECEfq4YSd9L>

Is DeFiChain willing to provide backlinks to listing sites and exchanges? Yes, on:

<https://defichain.com/dfi-token/>

TECH INFO

Number of confirmations until seen as final: 5 blocks

General description of technology - whether it is blockchain-driven or not, smart contract support etc: Bitcoin-fork with 100%-compatible Bitcoin wallet RPC calls.

Full node / Wallet software - where to download, how to install and run on Windows and Linux (Ubuntu), documented command line arguments: Latest releases for Linux, Windows, Mac can be found here: <https://github.com/DeFiCh/ain/releases> CLI only.

Detailed documentation for node's API, primarily following methods: All our commands are 100% compatible with Bitcoin.

create new address (account):

defi-cli getnewaddress

send transaction:

defi-cli sendtoaddress ADDRESS AMOUNT

get transaction by ID:

defi-cli getrawtransaction TXID

find all transactions by parameters - receiver address (account), time period, starting/ending block, etc.

Can't do this on blockchain directly, you'll have to index it. It's the same as Bitcoin.

We do have explorer that you can use: <http://mainnet.defichain.io>

Whether there is a system of notifications on new block or incoming transaction (like in Bitcoin). If there is - documentation on that system.

It's the same system as Bitcoin. If you have Bitcoin integrated, it would be a drop-in replacement with DeFi chain. You can also host the explorer on your own:

<https://github.com/DeFiCh/defi-explorer>

Available production-ready solutions (libraries/SDK) for different programming

languages: 100% Bitcoin wallet command compatible. Download binaries from

<https://github.com/DeFiCh/ain/releases> CLI only.

Access to test net, faucets or other ways to receive test coins: Email tech@defichain.io with your address. We'll send you test DFI.

How many symbols after the comma are the minimal units of Cryptocurrency = How many decimals?: 8 - Same as Bitcoin

The commission range for cryptocurrency in the internal network (the algorithm – if different depending on certain: You pay network/miner fee. It's negligible.

Is the coin developed on the basis of the existing coin - If yes, on which one? Yes. Bitcoin.

Encryption Algo: SHA256 (Hashing and PoW) and Elliptic Curve Cryptography (ECC) for address generation (like BTC)

SECURITY AUDIT REPORTS

Audit result: **PASS**

Audit No. : BCA002009180001

Audit date: September 18, 2020

Audit team: SlowMist security team

Summary conclusion: After correction, all problems found have been fixed and the above risks have been eliminated by DeFiChain. Comprehensive assessed, DeFiChain has no risks above already.

<https://defichain.com/downloads/defichain-security-audit-slowmist.pdf>

Audit result: **PASS**

Audit Number: DeFiChain-GLSJ-20201020

Audit date: October 20, 2020

Audit team: Knownsec security team

Summary conclusion: Status SAFE, 5 Stars, no vulnerabilities found under all risk categories

<https://defichain.com/downloads/DeFiChain-Security-Audit-Report-V1.pdf>
