

# Chalk for Climate!

1. **Find a space in your community that has a lot of foot traffic:** This could be a park, or simply a large sidewalk that many people pass daily. Be careful not to chalk private property.
2. **Get sidewalk chalk:** Sidewalk chalk is inexpensive, and can be purchased at Walmart, Target or Fred Meyers.
3. **Pick a campaign to focus on:** Choose one of our Earth Day [climate campaigns](#) to center your artwork around! Click the link to find our designs to inspire you!
4. **Design your chalk mural:** Though this project accounts for a lot of artistic license, there are a few aspects *the murals should include*:
  - The title “Earth Day 2020” in large letters
  - The link (<https://350pdx.org/earthday/>) for more earth day information.
5. **Draw your mural:** This is the fun part. Draw your design! Be careful not to get in the way of pedestrians. Everyone can make art, and having a cause behind your actions makes the process even more fun.
6. **Encourage others to add and participate:** Involve your neighbors! Through sharing photos of your art to telling others about the action, you can spread the word about the online rally and other activities regarding earth day advocacy. Send photos of your artwork to [sophiejpbabysitting@gmail.com](mailto:sophiejpbabysitting@gmail.com) to be featured in the virtual rally!
