

This is meant to break a tie between two (or more) aspects.

To find the one you need, ctrl + f "aspect vs aspect".

Highlight black line to reveal answer.

If you have a three-way tie, look at each pair (so A and B, B and C, and A and C) and see which one "won" twice. If all three won once, think about which statements you feel most strongly about.

For a four-way (or more) tie, try to eliminate at least one first.
