

fatty liver symptoms

## Non-alcoholic Fatty Liver Symptoms

The signs and symptoms of [nonalcoholic fatty liver disease](#) (NAFLD) vary widely, depending on the stage of the condition. During the early or middle stages of the disease, patients typically have no [symptoms](#) directly related to liver disease. However, as the disease advances, patients may experience symptoms of cirrhosis, including:

- Fatigue
- Memory loss or confusion
- Fluid retention in the abdomen or legs
- Passage of tarry black stools, which suggests internal bleeding
