

Hi Heather,

I saw your post on lab grown meat 🤢

If you haven't seen Soilent Green, it's a pretty good movie, and the thought of using cancerous tumors to "grow" "meat" definitely reminds me of it.

On a more positive note, I signed up for your newsletter and was happy to receive your free 10 step guide, nice work!

The welcome email containing the guide was short and sweet 😊

I liked it so much that I couldn't help but think, "what if it was longer, and sweeter?" 🤔

So... I put pen to paper (finger to keyboard) and did indeed craft one longer, and sweeter. 🔍
And more engaging, that I think your subscribers to D—x So— will love love love.

Want to see it?

In Health,

Charles Knowles
