And because not everyone is familiar with SFM, or may not know certain phrases and terms, here's a handy chart to help better understand what's said in this section. This list will likely expand if necessary.

SOURCE FILMMAKER TERMINOLOGY	
Session	This is where everything happens. Model loading, posing, resizing, lighting, etc.
Scenebuild	This refers to the process of building a scene from scratch. Walls, floors, furniture, posters, props, etc. If it needs to be made from the

	ground up, then it's a scenebuild.
Render	This is the term for the final image and/or video made in SFM.
Flexes	These are specialized settings that are applied to some models. As an example, these can be used to change facial expressions, breast size, penis length, etc.
Bodymorph	This is a term that's usually seen a lot with NexGen and ReVamped and refers to the shape of an anthro body. Fat, skinny, gangly, muscular, etc.
Headhack / headhacking	This is a process wherein I can take a non-anthro model, or a model with no NSFW body, and "hack" their heads onto an anthro body for the purpose of porn. Results vary, depending on the model(s) in question.
Scene	This is a single shot rendered in SFM. Sometimes also referred to as a "Page" like a comic.
Angle	This is an alternate shot rendered within the same SFM session.

A NOTE ABOUT WHAT SOURCE FILMMAKER CAN AND CAN'T DO. SOURCE FILMMAKER IS NOT BLENDER!

SFM is an old and outdated program that Valve released in 2007. It is an old program, abandoned by its developer. This is what's known as Abandonware and it happens pretty frequently.

SFM cannot do the same things Blender, Cinema4D, DazStudio, and other 3D programs can do. It cannot be used to create models from scratch. It doesn't have any advanced physics systems, such as for liquids. What you may be picturing in your head likely isn't possible given how limited this program is. Obviously, you're free to ask if I can do something. But it's important to know that SFM is very limited in what it can and can't do.

Please do not ask me to make models, or textures, as I can't do that in SFM and I don't have the knowledge/skills to do this in Blender.

****REGARDING AI MACHINE LEARNING****

You do not have permission to use my artwork for AI machine learning of any kind. While I can see the value of AI being a useful tool to help artists get through bouts of writer's block, there is nothing else of value regarding generative AI artwork.

For a list of what I will and won't do, go to **THIS SECTION**.

For a list of all the characters I have available*, go to **THIS SPREADSHEET**.

I do accept OCs, though I ask you to please have a model ready. I don't make models, again refer to this disclaimer.

*This list is not definitive, as I have well over 40,000 models at my disposal in SFM, from props to characters. If there's a character not listed, feel free to message me and I'll take a look.

CONTENT GUIDELINES

The following section will go over the content that I'm willing to work on and what circumstances (if any) I have to be willing to do said content.

Content / Fetish	Circumstance
Safe For Work	No circumstance
Not Safe For Work	No circumstance
Non-sexual Violence and Gore	No circumstance. I'm open to more violent and aggressive ideas, so long as it isn't used in a pornographic context.
All sexualities	Whether it's straight, gay, lesbian, bi, pan, etc., I'm down for all representations.
Furries and general anthro	My speciality, as I love furries and anthro ponies.
Foalcon	I'm open to more risque fetishes such as foalcon, whether it's anthro or feral. Though feral is iffy for me as I'm not accustomed to the feral anatomy of animals.
Cub	While I can't do cub work for SFM (outside of foalcon), I'm down to write cub content for short stories.
Lolicon / Shotacon	It's dependent on the character you're looking for. Likely not possible.
Age regression / age progression	No major circumstance, save for nothing younger than toddler. That's a general rule for this kind of art.
Incest	No circumstance
Lactation	No circumstance, as I love most things within this realm. Pregnancy may be circumstantial, but not fully off the table.
Worshipping	Whether it's for genitals or for feet, no circumstances.
Cuckolding	Only if it's more playful and less demeaning. I'm not a big fan of tearing people down for

	the sake of sexual gratification. An example of playful would be a wife riding a guy reverse cowgirl as she shakes her tits at her husband. Teasing and playful, not being a bitch.
Macro / Micro	No circumstance, so long as nothing ends in death or misery.
Hyper Genitalia	I'm only interested in Hyper stuff if it involves cocks, balls, breasts, and nipples. Anus and pussy possibly, but can't be guaranteed.
Human on anthro	No circumstance
Impossible Penetrations	This is for stuff like fucking a girl's nipples, fucking someone through one ear and out the other, or fucking something with a cock so big and long it (non-violently) skewers the partner.
Shape Change	This includes things like melting, flattening, stretching (like Elastigirl in the Incredibles). SFM is wishy-washy with most of this, but I'm happy to do these for short stories.
Cum Inflation / Milk Inflation	These are the only types of inflation I'll work with; cum and breast milk.. Nothing with water, nothing with other bodily fluids, nothing with gases. Just these two.
Body Modifications	I define this as having multiple appendages; such as four arms, six breasts, two cocks, etc. This also includes the more bizarre stuff like dicknipples or lipples.
Cum Transformation	Like my usual trend, only if it doesn't end in death. I prefer there to be the heavy implication that the prey can reform later.
Inanimate TF	Circumstantial, inquire further. Also wishy-washy with SFM, but not so much for short stories.
Goo People	No circumstance, just iffy with SFM.
Vore	So long as it doesn't end in death. Can be

	oral, penile, vaginal, anal, etc.
Tentacles	Only if it's implied that the target is consenting and enthused.
Somnophilia	Same as tentacles, so long as there's an implication that the parties involved consented to the act. Or showing indifference when conscious.
Humiliation	While I've made some stuff regarding Small Penis Humiliation, this is something I'm no longer comfortable with.
Dubious Consent	This is a bit hard to explain, but it's the concept of one partner saying no to sex yet not actually resisting any advances.
Necrophilia	Now we're getting into the oddly specific stuff. I'm okay with necro stuff, so long as it isn't extremely gory or violent. Like a mortician alone in a mortuary or something similar.
Smegma	Absolutely not, there is no circumstance I would ever be okay doing this.
Degradation / Extreme Humiliation	Absolutely not, I'm not into mental abuse, even if it's consensual for the sake of sexual gratification.
Chastity	This is something I'm not into at all.
Watersports	If it's pissplay, that's fine. Just no piss drinking.
Vomiting	Absolutely not
Menstruation	Absolutely not
Farting	Absolutely not
Diapers	Absolutely not, no matter what context.
Scat	Like with watersports, only if it's in the context of playing and not actually swallowing shit.

Sexual Torture	No whips, no CBT, no tit torture, no clit torture. Nothing that would cause extreme pain and be considered “torturous” by most other.
Guro	Sexual gore. Redundant, I know, but still want to make this perfectly clear. Absolutely not.
Rape	Absolutely not, dubious consent at most.

This is about as extensive as I can get in terms of what I’m willing to do. If there’s something you have in mind that isn’t listed here, feel free to message me for further discussion and I can update the list accordingly.
