October 2021

More Gate News

Our gate vendor has installed a supplemental gate call box antenna, improving remote access. **To enter Parkstone after 8:00 PM**, stop your car at the tree on the right closest to the gate. Your remote should easily open the gate from that point.

Or, using your cell phone (listed in the Parkstone Directory), you can also call the gate directly at **385-302-6877**. If you have other household members who need access to the gate with their phone, send their phone number to [Jim Anderson](#) to be added to the Caller ID list. *Please advise if you have continuing problems with your remotes.*

Water and Lawncare

Water Pro shuts down the irrigation system today. **Now is a good time to shut your sprinkler system off** as the weather is cooling off. Mowing will continue through October to keep falling leaves picked up. Winterizing sprinklers will begin in the next week or two. Fall cleanup will happen after we lose more leaves in November.

Local Honey

Sheryl and Dan Hornok raise bees in the area and are harvesting their **raw honey**. This honey very likely has nectar from our flowers in Parkstone. You can't get more local than that. As they did last year, they will be selling their honey in the East parking area on Estates Way this **Saturday**. Cost: \$10 per pint.

New Neighbors

Welcome to **Rick and Ashlynn Fletcher** and their cute little daughter Mya, 18 months old. They have moved into the home at **12358 S. Parkstone Court** (formerly Andrea Boyce's home). Rick is a medical student at the University of Utah majoring in Biology and Genetics. Ashlynn works as an Escrow Assistant.. We are so happy to have your wonderful family in our neighborhood!
