“Lead, Follow, Or Get Out Of The Way”

I think it is great that you are digging in the way you are. I don't know of any time in your life that you were THIS involved in anything, especially this worthy project of growing healthy food, and teaching people to be independent of the system that has been brutalizing them.

Maybe it is your good spouse, and perhaps it is, in a tiny part, me encouraging you. I hope that the sum of my input is to encourage you and not drag you down as so many other things and people have done.

The idea of working through, and with, women is good because we live in a time where men are increasingly weak and worthless, what time they are not just destructive.

I just want you to have a large vision, the effort is the same whether you have the large vision or the small version. No one gains anything by thinking small. Aim high, there is more room there.

Today it hit me anew that the only people that matter are the entrepreneurs, AND those who enable and follow them. Both of these groups together constitute a very small number of people on this earth. And by entrepreneur, I mean to include leaders in all three of the fundamental bases of life on this earth, **Religion, Business, and Governance.** All three desperately need entrepreneurship, and have way too few of them.

People like you and I should try to never associate with the billions of failures on this earth, other than those special few people who have the entrepreneurial spirit, who will set us all a right example, and those who will sacrificially help us follow those examples. The other billions of drone people on earth do count, but only as the producers of children out of which some future children of promise MAY come.

The saying "Lead, Follow, or Get Out of the Way" says it all. More than 90 percent of all people fall into this latter category, and should be shunned like the poison they are. But, sadly most of our lives have been around those types. They have been a millstone around my neck. Try not to do it. Beware of these downers. And this includes, sad to say, practically all of our family members. Hard to swallow but the truth is the truth.

children, when under ideal circumstances, it takes 2.2 children for any human population to barely reproduce themselves. This rate represents national suicide, and a genocidal holocaust of our people and nation brought about by narrow Special Interests that have an agenda based on a dislike of America, and all it stands for. **Thank You for visiting this teaching.
