Press Release - May 24th, 2021
FOR IMMEDIATE RELEASE

Hello and good afternoon everybody.

Our party has just released our platform for the bolder, brighter and better future of our country. In our platform we have addressed the pressing matters that matter most to Canadians and our support plan for the COVID-19 pandemic

Unlike the Onyemaobi Liberals, we would like to run recovery programs as smoothly as possible and reinvest in our economy by purchasing Canadian made PPE as opposed to the Liberals who have let recovery program fraud slip through the cracks and purchased PPE from overseas markets instead of supporting our Canadian economy which so desperately needs the help.

I would like to quote the Mayor of Ajax Ontario, Shaun Collier, we will be “cutting the red tape and rolling out the red carpet” for businesses and individuals in a post pandemic world. We will work hard to preserve our environment and reform the outdated Onyemaobi carbon tax that so desperately needs it, shifting the onus away from hard working Canadians and providing incentives to companies for green spending and innovation.

We will work hard to further our relationship with our First Nations friends, seniors and veterans instead of leaving them behind like the Onyemaobi Liberals. Instead of neglecting the crises that our First Nations people face on a daily basis and forgetting to support our veterans that have fought so tirelessly for us and our way of life as well as leaving seniors with an inadequate retirement plan, we will deliver much needed help by reforming the ministry of indigenous affairs, investing in our indigenous communities, investing into mental health supports for veterans and increasing Old Age and CPP/QPP.

Folks, together under the Conservative Party of Canada, we will make Canada a better place and we will steer the ship in the right direction.

Thank you very much for your time everybody, have a nice day.
