

Logging into a Student Chromebook & Canvas

1. Lift the lid of the Chromebook to power it on, or press the Power button. 

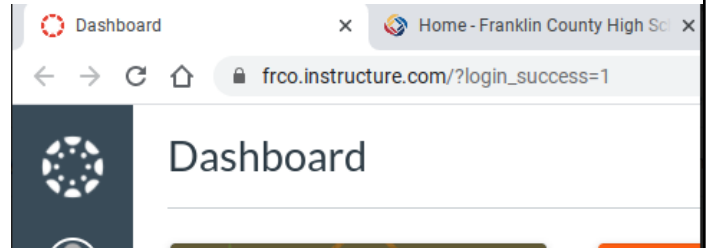

2. Sign into the Chromebook with the Student's Google account, then click 'Next'. **Typically a student's username is (all lowercase and no spaces) last name first initial middle initial. Contact the school if you do not know the username.**

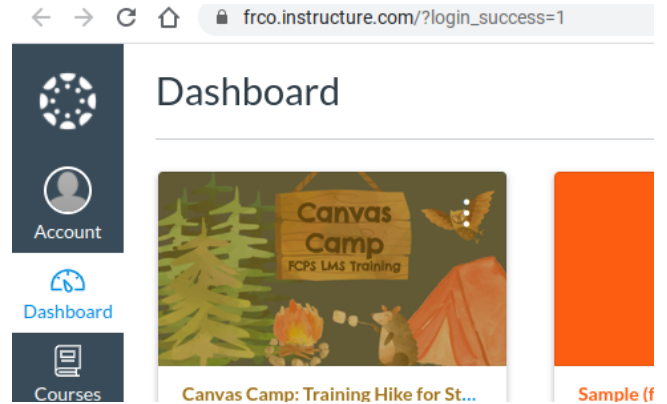

3. Input the password and click 'Next'. Elementary student passwords are **fcp1234** and Middle/High students are their last name (all lowercase) with their lunch number (no spaces).

4. After signing in, the Chrome web browser will automatically open and 2 tabs will appear at the top. The 1st tab will be the Canvas LMS (Learning Management System) Dashboard and the 2nd should be your school's website.

5. Since you are signed into the Chromebook you will already be signed into Canvas. To begin using Canvas, simply click on a Course within your Student Dashboard (or Home if you're Elementary).

If students accidentally close out of Canvas, all they need to do is re-open Chrome.

If you need assistance with your username or password **please contact the school.**
