

## GOAL ZERO SHERPA 50 POWER PACK

TP-LINK, a Global provider of Networking Products has introduced the Portable Power Bank TL-PB10400. Apart from having sleek look and classy design, it comes with a powerful capacity of 10400mAh which will ensure that your smartphone charges 3~5 times, keeping your devices running all the time.

This is where a portable power bank charger can be an absolute Godsend! With advances in technology, our gadgets provide us with convenience and lightening speed communication. With tremendous increase in their usage, larger screens, constant access to the internet, the power does drain out even though they have large capacity batteries. Hence there is a need to keep them charged at all times. It is for this reason that many companies have introduced Power Banks in to the market.

It is important to choose the best power bank for our mobile phones, to have uninterrupted usage. The revolution in the field is taking new heights. Portable chargers are a big blessing for the smart phone users.

TL-PB 10400, an impressive powerbank from TP-Link

TP-LINK, a reputed global provider of networking products has introduced the Portable Power Bank TL-PB 10400. Apart from having a sleek look and classy design, it comes with the powerful capacity of 10400 mAH which will ensure that your smart phone charges 3-4 times, keeping your device running all the time.

It is advisable to avoid cheap power banks, especially those whose features sound too good to be true for the price. But once in a while something comes along and attempts to overturn the rule of thumb. Yes, we are referring to TL-PB 10400! It uses the best grade A Lithium polymer battery to ensure the real 10400 mAH capacity(100 % real capacity guarantee) and offers maximum charge speed for you. Its compact feature and easy portability makes it the most cherished possession among customers, especially those who are on-the-go type.

Dual USB ports with 5V/2A and 5V/1A allows charging of two devices simultaneously. This means you can charge your tablet and smart phone at once. Built-in special circuit provides full power for your smart phones. TL-PB 10400's multiple protections of short circuit, over-voltage , over-current, over-charge, over-discharge and over-heating ensure safe and reliable charging to avoid any potential harm to your device.

Branded portable power banks are usually expensive but the quality is assured. For instance, if it says it comes with 2000 mAh, you are assured of getting 2000 mAh capacity battery. Where as a non-branded power bank may display a 15000 mAh capacity due to firmware tweak, or low grade material that will last only 100 cycles. TL-PB 10400 with its powerful 10400 mAh capacity at affordable prices offers above 500 recharge cycles over the life of the battery, takes care of the above mentioned issues.

With low discharge rates-means you can charge it and keep it for 12 months and it still retain about 75% of the capacity, where as others will probably retain 0 capacity.

TL-PB10400 comes with an additional built-in flashlight, which comes handy for in-house as well as off-road activities and four LED lights that work as charge indicators to show battery level or charging status. The universal compatibility with almost any smart device like iPhones, iPads Android smart phones or Tablets and other 5v input USB charged devices improves its usability.

It's sleek, stylish and pocket-friendly design with one year warranty , PB-TL10400 has everything you expect in a premium portable back up battery charger. beautifully crafted to fit perfectly in the palm of your hand!

With TL-PB10400 you don't have to choose between a portable charger and a stylish one! You can have it all. It is a boon, especially, for people those who are on-the-go type.
