Haldol injection on Jun 25, 2023

• RA didn't have any side effects from the 5 mg Haldol lactate so Martin asked for RA to get 50 milligrams of the long-acting Haldol decanoate every four weeks.
• The max dose of Haldol decanoate is 450 mg so the dose RA was getting relatively was small "but if you consider that medication is for 30 days and he's getting 50 milligrams, he's actually getting the equivalent of a little less than 2 mg a day."

Date	Description	Dose	Form
4/14/2023	Haldol lactate	5 mg	Intramuscular 1x a day
4/15/2023	Haldol lactate	5 mg	Intramuscular 1x a day
4/16/2023	Haldol lactate	5 mg	Intramuscular 1x a day
4/17/2023	Haldol lactate	5 mg	Intramuscular 1x a day

Date	Description	Dose	Form
4/18/2023	Haldol decanoate	50 mg	Intramuscular 1x every 30 days
5/8/2023	"little bit of Haldol"	"slightly higher dose than I would normally	Oral How often?

		have done”	
5/18/2023	Haldol decanoate	50 mg	Intramuscular 1x every 30 days
6/17/2023	Haldol decanoate	50 mg	Intramuscular 1x every 30 days
6/25/2023	Haldol	unknown	unknown

Rozzi said RA also received Haldol on June 25th.
