TAB BANK

September 2020

VISION AND MISSION

We focus on All In One Platform and Personal Banking

Our mission is to become the leading global online digital bank (personal banking).
We create SUSTAINABLE VALUE for our customers.

We are working to create an alternative, scalable, secure, transparent, efficient, inclusive and equitable financial system for all.

We create a crypto ecosystem(c2c) that include: e-commerce, social networks, exchanges and crypto wallet, gaming. (mobile app on Google Play and Apple Store and on domain Tabus.co(from September 2021) and Tab.games(from October 2021)), **All in one platform**

VISION

1. **Becoming the Crypto Ecosystem and Online Digital Banking System**
2. **Building a cryptocurrency ecosystem and DEFI (decentralized finance), and new generation blockchain**

· TAB ECOSYSTEM ·

TOTAL SUPPLY ONLY 36 000 000 TAB

PROBLEM AND SOLUTION

Problem

There are a lot of mobile apps like Facebook, Amazon, Tinder, LinkedIn, Binance, Trust Wallet, etc. But no app can connect all people on one platform

Cryptocurrencies are not yet to be used in e-commerce, social network, or others platform

Payments online are not convenient in many countries, users must have to use visa cards or internet banking, card security issues and card opening procedures require a lot of time and costs.

There are no platforms that can both work and participate in entertainment and earn money, play to earn

TABUS Mobile can connect people by using new technology, making it faster, cheaper and safer all in one platform.

Solution

- Tabus can connect all people on one platform
- Cryptocurrencies are to be used in e-commerce, social network, or others platform
- Payments online are solved, fast security and easy to use
- Users can play to earn when joining TABUS with TAB Games.

The world needs a mobile application that can include all the functions of e-commerce platforms, social networks, exchanges and e-wallets where users can buy and sell, make online payments with crypto, make friends, find a date, find jobs, borrow money, exchange and store cryptocurrencies. TAB Mobile will have all these functions in one place.

Vision and mission

The details of the business model, vision, mission, and terms of service are the rules that the user agrees to follow in order to use this service. It is a bilateral statement of liability and regulations of use between the service provider and the customer.

ROAD MAP (Project development stages, We build d-apps and ecosystems)

2019

Building the vision, mission and strategies.

Preparing the technology platform, Building the team and ecosystem

- Our mission is to become the leading global online digital bank by creating SUSTAINABLE VALUE for our customers.
- We are working to create an alternative, scalable, secure, transparent, efficient, inclusive and equitable financial system for all.

2020

Setup the technology blockchain and business model

- What is the best blockchain platform suitable for banking? It must be Secure, Fast and Cost Effective.
- We chose TomoChain - one of the best blockchain platforms in the world for developing our ecosystem.
- TomoChain with its new modern algorithm provides proof of stake voting which is better than the previous blockchain generation.
- It is faster, cheaper, and easier for developing d-apps.

10/2020

TAB sales, fundraising

08/2021

End ICO

- End the ICO phase.
- Bonus for communities.
- List on Vindax, Dex-Trade, FinexBox, Xt.Com, LUASWAP... exchanges.

09/2021

Tabus.co : Launching and building e-commerce mobile app and website (domain tabus.co)

- Building e-commerce and exchanges platform, TAB tokens used as payment method and bonuses. For each member's actions such as buying, selling, ordering, commenting and posting
- Bonus points are awarded to members. Members can buy and sell bonus tokens to TAB and TAB to tokens. Tokens can be used for purchasing advertising posts, banners or products.
- Listing on some international exchanges.

10/2021

Start building social networks, p2p exchanges, TAB Wallet d-apps,....

- Listing on CoinMarketcap, CoinGecko.
- Integrating Trust Wallet.
- Launching games online on domain tab.games(play to earn): Candy Crush Saga, Tetris, 2048..., (join play via TAB, reward top ranking by TAB)

03/2022

Launching e-commerce and crypto P2P exchanges, social networks, TAB Wallet

- Launch e-commerce and social network: users can buy services and pay with TAB tokens.
- TAB rewards for users who create good content on social networks.
- Launch TAB Wallet: users use TAB Wallet to store TAB tokens for buying products and creating content on social networks. It can also be used for paying for services when Traveling, at Coffee shops and when Shopping.

04/2022

Implement TAB e-commerce d-apps, social network, crypto P2P exchanges

- Managing and operating e-commerce, social network, exchanges platform.
- Integrating functionalities for shopping and online payments via TAB Wallet.

08/2022

P2P lending on TAB Wallet

- Peer-to-peer lending via TAB Wallet.
- P2P lending is a business activity on a blockchain platform that is different from the loans you access in traditional financial banking services (centralized finance). You are not borrowing from a financial institution, but rather from an individual or group of individuals who are willing to lend money to qualified applicants. P2P loan sites connect borrowers directly with investors without going through financial intermediaries. It is direct peer-to-peer lending.

09/2022

Launching TAB Digital Banking

- Remote account opening in under 5 minutes.
- Loan application in a few clicks.
- Instant P2P payments.
- A variety of Loyalty Programs.
- P2P lending.

01/2023

Start building TAB cryptor exchange, like Binance and will build generation blockchain call TABUS

- We will build a crypto exchange platform like Binance.
- We will write the new generation blockchain with the following features:
 - + Everyone can participate in mining without expensive hardware or complicated installation
 - + Transaction speed up to millions of transactions / 1 second
 - + Easy to install on mobile devices and web browsers

TECHNOLOGY AND TECHNICAL FAQ

What technology is TAB based on?

TAB is a TRC21 token built on the latest generation blockchain platform -TomoChain (3rd generation blockchain). It adopts the latest Proof of Stake Voting consensus algorithm with many outstanding advantages over old blockchain platforms like Bitcoin (generation blockchain 1) and Ethereum (blockchain generation 2), which is thousands of times faster and cheaper.

TomoChain is a company from Japan and Singapore. It is also one of the leading blockchain technology companies in the world, founded in 2017 and raised tens of millions of dollars through the world's financial investment funds.

TAB Bank applied the technology on TomoChain's technology platforms with the most outstanding advantages: fastest and cheapest transaction speed.

Which wallet can TAB be stored?

TAB tokens can be stored on popular wallets such as Trust Wallet and Tomo Wallet. To send and receive TAB, you can read the following instructions: <https://tabank.org/help>

What is the smart contract address of TAB?

TAB's smart contract address is 0x8103bb77ed2035b5da9a3a65d9c313cb6ee41dbd (used to add new tokens at trust wallets) and can be accessed here:

<https://scan.tomochain.com/tokens/0x8103bb77ed2035b5da9a3a65d941c3bdc6ee>

What is TAB's transaction speed?

TAB's transaction speed is 2000 transactions /second, along with Tron and Solana, TomoChain is one of the blockchain platforms with the fastest transaction speed today.

How many TomoChain consensus nodes are there?

TomoChain has 150 proof-of-stake consensus validation masternodes, and TomoChain only owns 4 masternodes. These 150 master nodes belong to the entire world community, which makes this a decentralized platform when no one owns this TomoChain network. Therefore, this is the strength of decentralized technology when no hacker can control the network and fake transactions.

A TomoChain Masternode is a server which uses its computing power to contribute to the network. Its job is to create and sign blocks. For this contribution to the network, masternodes

receive rewards in the form of TOMO. Masternodes are elected using the PoSV consensus via our governance Dapp TomoMaster.

DISTRIBUTION & FINANCIAL PLAN

- Token name: TAB BANK
- Unit name: TAB
- Token type: TRC21 issued on TomoChain
- Starting price in private sales: 1 TAB = 0.1 USDT
- Total supply: 36 000 000 TAB ([link](#))
- Circulating Supply: 36 000 000 TAB (private sales and airdrop, shareholders, listing on the exchanges for users need tab for payment online in mobile apps and games)

The financial plan of the project will be allocated as follow:

- 15% for the project team and project management cost.
- 20% for bonus and communities
- 65% for project development

All transactions are recorded, scanned on smart contract at the following address:

<https://scan.tomochain.com/tokens/0x8103bb77ed2035b5da9a3a65d9c313cb6ee41dbd>

, investors can check transparently and freely.
