Loving All God's Creation
Discussion Questions

1. How does your faith direct you to take responsibility for protecting and preserving God's creation?

2. Have you seen evidence of climate "weirding"? Do you believe these changes in the climate are caused by what humans are doing? Why or why not?

3. Instead of starting a conversation about climate change with scientific evidence, consider Dr. Hayhoe's approach. She advises us to discover what you and your friend have in common. Then talk about how climate change can affect that which you both care about. Would you feel comfortable trying this approach when talking about climate change?

4. What practical suggestions could you offer to others to consider adopting?
