

Hello,

I am writing to urge you to support AB 44, the California fur ban bill. The cruelties of the fur industry have been well documented. Wild animals like mink, who were born to swim and roam great distances, are housed in filthy wire cages, where they often go insane with misery - sometimes chewing off their own limbs or killing their own babies.

California citizens now have the opportunity to help stop the suffering of the most vulnerable among us - animals killed for their fur. Recently Los Angeles banned the sale of fur, joining San Francisco, Berkeley and West Hollywood. Now it's time for a statewide fur ban, one that will lead the way for other states and nations to follow.

Sincerely,  
[Your Name]
