

My goal for GMR during the 2025-2026 programming year is to strengthen our region's role in education, advocacy, and community action.

Misinformation and antisemitism are growing threats, and it's up to us to speak up, educate others, and take real action.

As Regional Shaliach, I will ensure our region is not only informed but also prepared to respond. I want to create community engagement nights that bring people together for real conversations about global issues, giving our members the tools to challenge misinformation when they see it. I will also push for stronger interfaith and inter community partnerships, working with local organizations to build connections and fight bias before it spreads.

Beyond discussion, I want to make activism more hands-on by organizing regional service projects, awareness and educational programs that empower every member to make an impact.

This year is about taking action, not talking about taking action, but DOING THE ACTIONS. By making education accessible, engaging, and community involvement a priority, it will create a region that is informed, united, and ready to take on whatever comes next.
