

Chief Product & Tech Officer (CPTO)

 Bangalore (on-site only) |  Team: 10 (->18) | Reports to Founder

About QuickAds.ai

QuickAds.ai is the AI ad engine powering thousands of performance marketers daily. From copy to creatives to campaign testing—we help brands move faster than their agencies. We've been **profitable since Day 1**, backed by leaders from **Google, Meta, and Kae Capital**, and scaled from 5 → 30 FTEs in 6 months.

Now we need a **CPTO** who can lead product + tech like a founder, not a manager.

What You'll Own

- Full-stack product & tech leadership—from roadmap to rollout
 - Hands-on execution across UX, backend infra, and AI systems
 - Lead a team of 10+ (engineering, product, AI)
 - Own quality, scale, and velocity—no shortcuts, no BS
-

You're Probably This Person:

- Scaled SaaS or AI products from **1→10**
 - Built or led teams in **martech, adtech, or visual AI tools**
 - Still wireframe, debug, or prototype when needed
 - Obsess over user experience and infra stability
 - Hate decks. Love commits. Live in Notion, Linear, Figma
-

What You Get

- Founder-level equity + top-tier comp
- Real ownership—vision, team, and product
- No layers. No fluff. Just velocity.

Contact: nitin@quickads.ai with description of what you have built and what you think we should be expanding the roadmap to be.
