

Tutorial Polls: how are the *lice* carried?

FAMILIES:

AS YOU ALREADY KNOW WE HAVE DETECTED LICE IN THE CENTER. LICE ARE A PARASITE THAT LIVES ON HUMANS.

FOR THIS REASON WE NEED YOUR HELP AND COLLABORATION.

WE PROVIDE YOU IN DETAIL WHAT WOULD BE THE PROCESS TO FOLLOW TO ELIMINATE THEM FROM THE HEAD OF YOUR CHILDREN:

1. YOUR SON/DAUGHTER SCRATCHES HIS HEAD VERY INSISTENTLY:

2. DETECT ITS PRESENCE ON THE HEAD:

3. APPLY THE TREATMENT THAT IS PURCHASED AT THE PHARMACY.

4. LET THE TREATMENT WORK.
5. PASS THE NITS RACK TO REMOVE THE “EGGS” OF LICE.

6. REPEAT THE PROCESS UNTIL IT IS ELIMINATED.
7. PERIODICALLY CHECK THE CHILDREN'S HEAD.

FOR IT TO BE EFFECTIVE, **ALL THE FAMILIES** MUST COLLABORATE.

THANK YOU SO MUCH.

TEAM OF TEACHERS FROM Ceip Cas Saboners.
