

Special school Board Meeting

Necedah Area School District

Kris Saylor Office

August 6, 2025, at 5:00 P.M.

President Dan Dutschek called the meeting to order. Present were board members Herried, McNally, Ard, and Horak for the opening of the meeting. Also present are Superintendent Tanya Kotlowski and Kris Saylor.

This was set up as a video conference call with Sitelogiq but became an audio conference with Jake when the video would not connect with the room. Ken at Sit logic was supposed to be available but did not join the meeting.

This meeting was regarding the drainage issue out of a waterspout in the back of the building. With rain, the amount of water was causing the ground to be washed out and pooling large amounts of water next to the building.

Jake reported that the engineer said the design was appropriate for the amount of water that was coming off the roof and should meet the demand. Consensus of the board and the school maintenance was this was not meeting the demand of water coming off the roof and they needed to fix this design flaw.

After much discussion, Jake said he was going to go back to those in the company and the engineer and report back to us at a later date.

Motion: by Roger Herried, second by John Ard to adjourn. Motion carried.

Respectfully submitted by:
Matthew McNally, DC, DCCJP
Clerk
