

FOXATHANE (OX-710)

Polyurethane Gloss

PRODUCT DESCRIPTION	Acrylic Aliphatic Polyurethane Gloss Finish.																																												
RECOMMENDED USE	Polyurethane finish coat where attractive appearance and a wide range of protection is required.																																												
CHARACTERISTICS	· Excellent gloss and colour retention. · Outstanding weather resistance with excellent colour and gloss retention. · Resistance to broad range of corrosive atmospheres. · Excellent resistance to atmospheric exposure. · Hard, tough and abrasion resistance. · Good resistance to splash and spillage of acids, alkalises, salt solutions and aliphatic petroleum products.

Colour	Available On Request																																												
Gloss Level	Gloss																																												
Volume Solid	Approx. 60%																																												
Dry Film Thickness	30 – 50 microns per coat																																												
Number of Coat	1 or 2																																												
Theoretical Coverage	12 sq.m/+ for 50 microns																																												
Temperature Resistance	Continuous	: 93°C (dry)																																											
	Intermittent	: 121°C (dry)																																											
VOC	230 g/+																																												
Flash Point	Base	: 29°C																																											
	Hardener	: 38°C																																											
Shelf Life	At least 12 months																																												
Pack Size	20 litres unit																																												
	Base: 16 litres, Hardener: 4 litre																																												
SURFACE PREPARATION	Refer to specific instructions for primer and intermediate coats being used for application. All previous coats must be clean and dry. Old coating system must be roughened, cleaned and dry.

Application Methods																																													
Airless Spray																																													
Nozzle Tip	0.46 – 0.58 mm (0.018 – 0.023 inch)																																												
Nozzle Pressure	10 MPa (approx. 1400 psi)																																												
Conventional Spray																																													
Nozzle Tip	1.8 – 2.0 mm (0.071 – 0.079 inch)																																												
Nozzle Pressure	0.3 MPa (approx. 43 psi)																																												
Brush or Roller	Recommended																																												
Mixing Ratio By Volume	Base : Hardener = 4 : 1																																												
Thinner	FOXANER 007																																												
Surface Temperature	Should be 10°C – 49°C, at least 3°C above the dew point to prevent condensation																																												
Drying Time																																													
Touch Dry	1 hour at 25°C, 30 minutes at 32°C																																												
Trough Dry	7 hours at 25°C, 4 hours at 32°C																																												
Over coating																																													
Minimum	4 hours at 25°C, 2 hours at 32°C																																												
Maximum	Unlimited																																												
Full Cure	7 days																																												
Pot Life	18 hours at 25°C, 8 hours at 32°C																																												

SAFETY PRECAUTION

Keep away from heat, spark and Open flames. Avoid breathing of vapour on skin and eye contact. Keep container closed and store in cool, ventilated area when not in use. Proper ventilation and protective measures must be provided during mixing, application and drying, to keep vapour concentration within safe limits and to protect against toxic hazard. Necessary safety equipment must be used and ventilation requirements carefully observed, especially in confined or enclosed spaces, such as tank interior and building.

DISCLAIMER

The information in this product data sheet is given to the best of our knowledge based on laboratory testing and practical experience. If the product is used under condition beyond our control, we cannot guarantee anything but the quality of the products it self. The information in this product data sheet is liable for modification from time to time in the light of experience and our policy of continuous product development, and without further notice.
