

FULL NAME

Job Title Applying to - Company Name

Cover Letter

Hello,

I'm excited to submit my application to Company Name. My experience in *previous career doing specific thing impacting other thing* combined with my experience with data (SQL, Python, Analytics, Visualizations) puts me in a unique position to understand *thing* and technical perspectives needed for this job.

Helping people *do blank* was one of my favorite parts of my *previous career*. I have seen firsthand what a challenge *thing* can be. Over my career, I experienced *these things that relate*.

[Paragraph about experience project management, business understanding and working on a team]:

As a *job title*, I have experience and proven success in managing projects with complex goals and multiple stakeholders involved. I know the importance of developing relationships with stakeholders and understanding the business needs and goals of the project. I ask questions and have a — *type of* communication style, and I am able to form relationships both in-person and virtually.

Over the last four months, I have developed valuable tech skills through bootcamp name in *list relevant skills/languages*, and more. I enjoy and excel at ----- . My experience in ----- sets me up well for — *[make a connection to technology]*.

I hope my experience and unique skills lead to a conversation with Company Name. You can find my contact information and link to my GitHub on my resume and I am happy to provide references. You can reach me via e-mail or phone anytime.

Regards,
