

Awesome Kidz 2

Unit 2 Lesson 6

Aim: Students will identify and sort objects by their colors (blue and purple) through interactive and hands-on activities.

Time: 45-60 minutes

Materials:

- Blue and purple scarves or fabrics.
- Printed and cut-out objects in blue and purple.
- Two baskets labeled "Blue" and "Purple."
- Large paper (one per group), blue and purple paint, sponges, and brushes.

Tip: Praise their effort and discuss how different colors make the world beautiful, tying the activity to the appreciation of diversity. Incorporate movement and sensory input to keep young learners engaged. Allow students to touch and feel the items when sorting or painting to deepen their learning.

Engage:

Color Discovery Walk

Prepare two colored fabrics or scarves (blue and purple).

Show the blue and purple scarves to the students and introduce the colors with excitement. Ask, *"Can you find something blue or purple around the room?"*. Allow students to explore the room and bring back any objects matching the colors.

Encourages curiosity and physical activity, stimulating cognitive and sensory skills.

Explore & Practice:

Sorting Game

Present the cut-out objects to the students on a tray. Let them take turns picking an object and deciding if it goes into the "Blue" basket or the "Purple" basket. Encourage conversation by asking questions like, *"Why do you think this goes here?"*. Emphasizes self-directed, hands-on learning and categorization.

With the book:

Book Page Practice & Review

Distribute the book page to each student. Guide them to circle the blue objects in one section and the purple objects in the other. As they work, ask reflective questions like, *“What is your favorite blue object?”*

Closing:

Collaborative Art

Divide the students into groups. Divide the paper into two sections: one labeled "Blue" and the other "Purple." Students create a collaborative mural by painting or stamping objects in the correct section. Encourage them to add details (e.g., blue fish or purple grapes). This activity fosters creativity, teamwork, and representation of ideas through art.
