

# Mirrors and Pattern Blocks

Materials: pattern blocks and mirrors

1. Let the students stand the mirrors open to an angle that they like.
2. Using the pattern blocks, make a design that is between or against the mirrors.

Questions you might ask students:

- Look at the pattern in the mirrors. What do you notice? What do you wonder?
- Move so that you are looking into the mirrors from a different direction. Do you see something different?
- Move the mirrors so they are further apart. How has your design changed?
