

# Go Fish! Make 10

Kindergarten and up

Materials Needed: Deck of cards with 10s, Kings, Queens, Jacks removed

Object: to make pairs of cards that equal up to 10.

Ex:  2 and 8 are a pair because  $2 + 8 = 10$

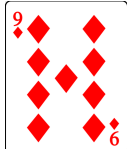

To Play:

Deal 7 cards to each player.

Remaining cards are put in the middle as the “Go Fish” Pile

Players look for cards that equal 10 and place those on the table

Player 1: Asks player 2 for a card that would make 10 with one of his cards.

Ex: If player 1 has a  , he would ask for a 1 

If player 2 has the card, he must give it to Player 1

If player 2 doesn't have the card, he says “Go Fish” and player 1 draws a card from the pile.

Play continues until someone has matched all the cards in their hand.
