Outreach & Messaging Toolkit

Toolkit Introduction

Local nonprofits and businesses have teamed up to shift the conversation about nonprofit effectiveness in southwest Washington. Together, we are promoting a free screening of UnCharitable, a documentary based on Dan Pallotta's [influential TED Talk](#). The film offers a compelling critique of five limitations holding nonprofits back:

1. **Compensation:** nonprofits have to continually advocate for compensating skilled staff fairly and can come under fire more easily
2. **Marketing:** nonprofits are seen as wasteful if they invest money into building out infrastructure to raise awareness around fundraising for their operations
3. **Risk:** nonprofits are not allowed to take risks like corporations are, leading to less innovation in solving the problems our society faces
4. **Time:** the window for success in the nonprofit space is forced into the short term, where long-term solutions that can span decades are not given space to thrive
5. **Capital:** nonprofits are shut off from the larger capital markets, including the ability to generate investment dollars in ways that Wall Street can for their businesses

Following the screening, attendees will hear from a diverse panel of local experts discussing how these limitations affect local nonprofits and what actions people can take to help change the dynamic. We hope this event will inspire meaningful conversations, shift thinking and accelerate nonprofit impact in southwest Washington.

First, we need to unite as a sector. As a nonprofit, you can help by getting the word out to your supporters. We've compiled this toolkit to make spreading the message easy. You'll find social media images to share, email content to send and flyers to post. With your help, we can raise awareness for this special event and reimagine how we give.
