Slug: /emface-non-surgical-facelift-in-poughkeepsie-ny/

KW: non-surgical facelift, non-invasive facelift, needle-free, toxin-free, lateral brow lift, facial toning, jawline contouring

Meta Description: Emface is a non-surgical facelift that uses revolutionary technology to lift and smooth loose or lax aging skin in Poughkeepsie, NY.

H1: Emface Non-Surgical Facelift in Poughkeepsie, NY

Emface is a ground-breaking skin treatment that combines radiofrequency (RF) energy and HIFES technology for the face. This FDA-cleared treatment dramatically reduces the signs of aging, such as wrinkles and fine lines. Additionally, RF energy effectively firms loose skin and increases collagen production for a sculpted, more rejuvenated appearance. Overall, Emface is a great non-surgical facelift alternative that is needle-free, toxin-free and requires no downtime or side effects compared to traditional face lift surgery.

Experience a renewed, contoured complexion with an Emface treatment at the Dental Design Studio. We are a top provider of safe, effective skin rejuvenation treatments in Poughkeepsie, NY. Our Emface experts help patients revitalize aging skin and produce amazing results. Call us today at (845) 452-7653 to book a complimentary Emface consultation and get one step closer to renewing your complexion and enhancing your natural beauty.

H2: Benefits of a Non-Surgical Emface Lift in Poughkeepsie, NY

Emface is a safe, non-invasive procedure. Radiofrequency (RF) and HIFES technology are both used to remodel and smooth sagging skin and boost collagen production.

Additional benefits of Emface include:

- Lift facial contours
- Reduce fine lines and wrinkles
- Jawline contouring
- Improve skin smoothness
- Improve facial balancing
- Non-surgical
- Lifted brows

- Increase collagen production
- Improve muscle tone
- Quick, convenient 20-minute sessions
- No recovery or downtime
- FDA-cleared

H2: Emface Before and After*

Emface is a non-invasive skin rejuvenation method for many of our patients in Poughkeepsie, NY. See the results for yourself in our before and after photo gallery. Patient's complexion looks firmer and lifted and shows improvements in aging signs such as fine lines and wrinkles after completing treatment sessions. As with any aesthetic treatment, results vary from patient to patient.*

H2: Understanding Emface Treatment

Emface is a non-surgical facelift alternative created by BTL Aesthetics. It is an FDA-cleared treatment and has no downtime or surgical side effects*. Individuals looking for a pain-free, needle-free, or filler-free alternative to a face lift opt for Emface treatments to reverse the signs of aging and achieve a more rejuvenated appearance.

During this treatment, applicators are applied over the face. Radiofrequency (RF) energy heats the facial tissue, smoothing the skin and increasing collagen levels. At the same time, electrostimulation (HIFES) activates the facial muscles, causing them to contract and lift.

Emface technology effectively reduces the appearance of drooping wrinkled skin and shapes the face to deliver dramatic results. Treatment plan consists of four 20-minute treatments, scheduled 5-10 days apart. After an Emface treatment, there is no recovery or downtime. Patients are free to resume normal activities.

H2: Emface: What to Expect

During your treatment, an Emface specialist uses a special handheld device that is gently applied to your skin. Generally, the treatment does not require numbing cream. However, the sensitivity of patients varies. A numbing cream can be applied beforehand to keep patients comfortable and minimize any pain.

The Emface device delivers low-level electromagnetic waves that penetrate your skin's surface. As these waves target the deeper layers of the skin, they stimulate the production of collagen. Collagen is a protein responsible for your skin's elasticity and

firmness. Collagen helps reduce the appearance of skin imperfections like fine lines, wrinkles, and skin looseness.

In addition, the electromagnetic waves boost blood circulation and deliver essential nutrients to your skin cells. This assists in creating a healthy complexion and a radiant glow. During your Emface treatment, the electromagnetic waves also promote the new skin cell production. As a result, this helps to replace damaged and aged cells with fresh, youthful ones. This improves the overall texture and tone of your skin and makes it look smoother and more flawless. On average, an Emface treatment takes under 30 minutes to complete. Patients describe the treatment as feeling like a warm, facial muscle massage.

H2: Emface Results*

Emface results vary. Results last for about one year. After a year, maintenance treatment is recommended depending on the skin condition and age of the patient. On average, Emface clinical studies reveal a 26%* increase in collagen, as well as a 37%* decrease in wrinkles. Additionally, studies show an increase in facial lift by 23%.

It is important to have realistic expectations about what a non-invasive facial rejuvenation treatment can achieve. Emface is a non-surgical alternative to a traditional face lift, but it is not a substitute. With a surgical facelift, the underlying muscles and skin are lifted, and excess tissue is removed. Emface can be a great alternative for individuals wanting more natural-looking improvement without the cost, pain, risks, and recovery time that comes with surgery.

H2: Emface FAQ's

H3: How Many Emface Non-Surgical Facelift Treatments Will I Need?

On average, a treatment plan consists of four 20-minute treatments scheduled 5-10 days apart.

H3: How Long Do Emface Results Last in Poughkeepsie, NY?

The effects of Emface are long-lasting. You can expect your Emface results to last for about one year. After a year, maintenance treatments are recommended depending on your age, skin condition, and the intensity of your treatments.

H3: Are There Side Effects With Emface?

Emface is a non-invasive procedure, and side effects are minimal. While rare, side effects include headache, dry skin, and/or redness.

H3: How Much Does Emface Cost in Poughkeepsie, NY?

The cost of Emface varies for each patient in Poughkeepsie, NY. The number of treatment areas and the number of treatment sessions all influence pricing. At Dental Design Studio, we customize a treatment plan that accommodates your cosmetic goals and your budget.
