Professional Summary

A final year Bachelor of Software Engineering student at the University of Technology Sydney. I have years of experience designing and developing software applications, leading teams of developers, and implementing intuitive, user-friendly, responsive web applications in the Finance, Real Estate and Logistics industry.

Technical Skills

Frontend Languages: Javascript | Typescript | HTML | CSS

Backend Languages: PHP | C# | Java

Framework: Angular | ReactJS | VueJS | ExtJS | Net Core | MVC | Bootstrap

Database: SQL Server | MySQL

Agile Tools: BitBucket | Github | Jira | Confluence | Microsoft Teams

Employment History

Web Developer

June 2023 - Present

Web Bird Digital

- Engage effectively with clients, discerning their unique requirements and providing strategic guidance.
- Utilise knowledge of React and wordpress to build and optimise custom digital solutions, enhancing user interface and improving overall user experience.
- Exhibit strong problem-solving and creativity, delivering outcomes that exceed client expectations.
- Leverage industry best practices and innovative techniques to ensure websites are not only aesthetically appealing but also functional, scalable, and maintainable.
- Assist clients in understanding the technical aspects of their projects, fostering strong client relationships and enhancing customer satisfaction.

Technical Scrum Master & Frontend Developer

April 2021 - June 2023

MRL Logistics

- Managed junior developers and interns during daily stand-ups as a Technical Scrum Master, fostering alignment, problem-solving, and collaboration.
- Developed a responsive mobile web app for warehouse managers using Angular PHP, enhancing productivity and user experience.
- Expedited backend and frontend development via automation of API/UI testing in in-house programs and scripts, enhancing application quality.
- Designed, developed, and deployed a Middleware application from scratch, integrating Shopify and MRL Ezishipping APIs to boost operational efficiency.
- Regularly updated web applications, maintained high-quality coding standards, managed Agile workflows using Jira, and ensured efficient version control with Git.

Full Stack Developer

November 2019 - February 2021

Bless Real Estate

- Utilised .NET Core 3, SQL Server, Razor pages, and Javascript to build robust web applications.
- Conducted productive meetings with clients for project elicitation and gathering precise requirements, ensuring targeted solution.
- Redesigned the architecture of the web application featuring integration with VaultRE and Squidex, showcasing interoperability skills and enhancing the efficiency and scalability, supporting business growth.
- Translated REAXML into the application backend, enabling seamless systems and data integration, improving operational efficiency.

Education

Bachelor of Engineering Majoring in Software (Honours)

March 2019 - June 2024

University of Technology Sydney (UTS)

- Distinction Average, 2023 Dean's List Recipient
- Academic Experience in Software Architecture, Project Management and Software Development
- Completed ActivateUTS Leadership Program and led teams for software projects throughout course subjects
- Directed UTS Society Clubs and partook in Consulting Case Competitions for Oliver Wyman and PWC

NSW Higher School Certificate

February 2017 - December 2018

De La Salle Catholic College Cronulla

- HSC ATAR of 85.9
- Highest Achiever in Information Process Technology and Software Design & Development
- Completed De La Salle College Leadership Program
- Partook in extracurricular activities for school, graphics design and charity events
