

YouScience Account Check Activity

10th-12th Grade

During your freshman year, your Transition to High School teachers should have helped you create a YouScience account to complete an aptitude and career discovery assessment. This assessment included “brain games,” and upon completion, you received a detailed report about your personality and strengths. Does that ring a bell?

If you were not at Kapolei High School during your freshman year but vaguely remember creating a YouScience account, it’s possible you did so in a Career and Technical Education (CTE) class. Some of our CTE teachers use the YouScience platform to administer industry certification exams.

Today’s Task:

In today’s Advisory/PTP class, you will check to make sure you can log into your YouScience account. If you created your account using your “kapoleihigh.org” email, you will need to add your new Hawaii Department of Education email to your YouScience account, since you no longer have access to your “kapoleihigh.org” email.

Unless you’re brand new to Kapolei High School this year, you will fall into one of four categories. Each category has different instructions for checking your access to your YouScience account. The categories are:

- **Scenario #1:** *You used a personal email address to create your YouScience account*
- **Scenario #2:** *You used your “kapoleihigh.org” email address to create your YouScience account, and you need to add your “K12.HI.US” email address, but **You Know** your YouScience account password*
- **Scenario #3:** *You used your “kapoleihigh.org” email address to create your YouScience account, and you need to add your “K12.HI.US” email address, but **You DON’T Know** your YouScience account password*
- **Scenario #4:** *I never created a YouScience account (most likely because I attended 9th grade at a different high school).*

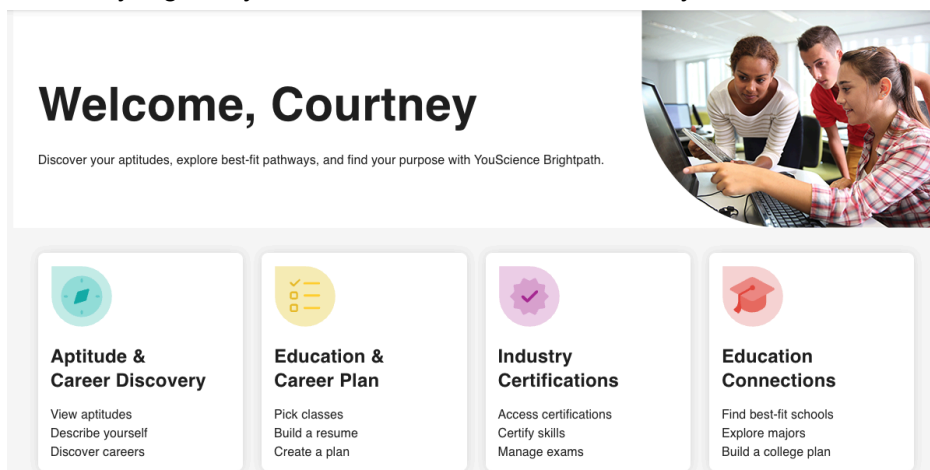

Based on the category you fall under, follow the specific set of instructions for today’s activity. See next pages for instructions.

Scenario #1: You used a personal email address to create your YouScience account

Follow these instructions:

1. Go to <https://signin.youscience.com/>
2. Under “Login,” enter your personal email address and your password.
 - a. If you don’t remember your password, click on “Forgot your password” and follow the steps to reset it. You’ll likely receive a recovery link sent to your personal email address.
3. Once you’ve reset your password, log in to your YouScience account.

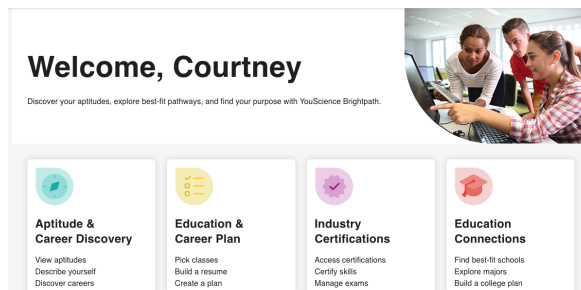

A successful login should look similar to the example below—except it will show your name instead. Be sure you can successfully log into your YouScience account. Then, you’re done.

Scenario #2: You used your “kapoleihigh.org” email address to create your YouScience account, and you need to add your “K12.HI.US” email address, but **You Know** your YouScience account password

Follow these instructions:

1. Go to <https://signin.youscience.com/>
2. Under “Login,” enter your KapoleiHigh email address and your password.
3. Click on “Log in with email.”
4. At the home screen, click on the “Aptitude & Career Discovery” box.
5. In the top right corner, you’ll see your full name and the term “Learner.” Click the dropdown arrow next to your name and select “My Account.”
6. Click on “+ Add Additional Email.”
7. Enter your K12.HI.US email address and create a new password that meets the listed requirements.
8. Click “Add.”
9. Log out of your YouScience account, then log back in using your K12.HI.US email address and the new password you just created.
10. A successful login should look similar to the example below—except it will show your name instead.

Scenario #3: You used your “kapoleihigh.org” email address to create your YouScience account, and you need to add your “K12.HI.US” email address, but **You DON'T Know your YouScience account password**

If you're unable to add your K12.HI.US email address to your YouScience account on your own, Ms. Courtney Suma or Ms. Alyssa Alcos (both located in the College & Career Center) will need to manually add it for you. If neither Ms. Suma nor Ms. Alcos is available when you are working through these steps, please email both teachers the following information (verbatim):

Complete this Google Form to inform both Ms. Suma and Ms. Alcos if you need your new email address added to your YouScience account. [LINK TO GOOGLE FORM](#) or bit.ly/HCAYOUSCIENCESURVEY

Once your **K12.HI.US** email address has been added, one of them will email you to confirm that this step is complete. After receiving that confirmation, you'll need to create a new password for your YouScience account by following these steps:

1. Go to <https://signin.youscience.com/>
2. Click on “**Forgot Password.**”
3. Follow the prompts to create a new password for your account. (You'll need to be able to access your new **K12.HI.US** email to complete this step.)

Scenario #4: I never created a YouScience account (most likely because I attended 9th grade at a different high school).

You will need to create a YouScience account using your Hawaii Department of Education email address.

Use the following Google Slides to help you create a YouScience account: [LINK TO GOOGLE SLIDES](#)
