

Mobile App Permissions

Use **Settings** on your device to allow Schoology to access various built-in features such as Camera and Files. If you previously denied access to the camera or files, you can change the permissions from this area.

Email and Mobile Text Notifications

In addition to the menu notifications, Schoology sends you email and mobile text notifications for Social, Academic, Group, and School activity that occurs in your account. In the **Notifications** area under **Settings**, you can manage which activity generates email or mobile text notifications.

Note: Email and mobile text message notifications differ from the Notifications menu located in the left navigation menu. The notifications listed under the navigation menu are not customizable. They display information related to course and group events in chronological order to alert you to Schoology activity. For more information on the notifications that appear in the bell icon menu, see: [What kind of notifications appear in the menu notifications?](#)

Managing Email and Mobile Text Notifications

To change the email and mobile notifications that you receive:

1. Log into the Schoology app.
2. Select **Settings** from the navigation menu.
3. Under **Account Settings**, tap **Account Info**.
4. From there, select the **Notifications** tab.
5. You can customize the notifications you receive by adjusting the various settings under the **Email** and **Mobile** column.
6. Be sure to tap **Save Changes** at the bottom of the panel.

Push Notifications

You can choose to receive a push notification on your Android device whenever an important piece of content is added to a course or group. Here are some examples of the types of occurrences our push notifications would relay:

- Course update post
- Group comments on updates and discussions
- New assignment or discussion post
- Receive a private message

When a notification arrives, if the app is closed, then you may see a banner or alert display on your screen. If the Schoology app is open, then the notification will be displayed on your screen. Tap the notification to take you to that piece of content within the Schoology Android app.

Enabling Push Notifications

1. Make sure you've downloaded the latest version of the Schoology Android app from the [Google Play](#) or the [Amazon App Store](#).
2. After installing the update and logging into the app, you will be prompted to enable notifications.
3. Select OK, and you will be registered for notifications.

Disabling Push Notifications

To disable notifications:

1. Go to your Android device Settings.
2. Select the Notifications option and then select the Schoology app.
3. Depending on your device, disable notifications.
4. You should stop receiving notifications immediately.

Re-Enabling Push Notifications

To re-enable notifications:

1. Go to your Android device Settings.
2. Select the Notifications option and then select the Schoology app.
3. Depending on your device, enable notifications.
4. As a final step, you will need to close the Schoology app completely from the background if it is there. And then restart the app.
5. You will now start receiving notifications.
