Correspondence Email:Correspondence@xxx.com*

The title of the paper should consist of 8 to 15 words, and clearly describe the research (Bold, 18pt, Arial)

Author¹, Author^{2*}, Author³ (Bold, 12pt)¹Institute/University, Country. (8pt)

.....

³Institute/University, Country. (8pt)**Abstract** (10pt)

The abstract should be written in English and provide a concise summary of the entire article, including the background, objective, method, results, and conclusion. It must be written in a single paragraph without citations or references, using clear and concise sentences. The abstract must be no longer than max 250 words, written in single line and paragraph spacing (1.0) on A4 paper, and the full article should consist of 6 to 12 pages. The text should be justified (aligned left and right) and presented without numbering or bullet points. The abstract should be followed by keywords consisting of 3 to 5 relevant terms that reflect the core content of the article.

he abstract should be written in English and provide a concise summary of the entire article, including the background, objective, method, results, and conclusion. It must be written in a single paragraph without citations or references, using clear and concise sentences. The abstract must be no longer than max 250 words, written in single line and paragraph spacing (1.0) on A4 paper, and the full article should consist of 6 to 12 pages. The text should be justified (aligned left and right) and presented without numbering or bullet points. The abstract should be followed by keywords consisting of 3 to 5 relevant terms that reflect the core content of the article.

INTRODUCTION (Use Heading 1 for chapters, 12pt, BOLD)

The article content consists of main sections using Heading Level 1, including: **INTRODUCTION, METHODS, RESULTS AND DISCUSSION, CONCLUSION, ACKNOWLEDGEMENTS*** (optional), and **REFERENCES**. The manuscript should use Arial font, size 10pt, with single line and paragraph spacing, and a total length of 6 to 12 pages on A4 paper. **Heading Level 2** should be used for subsections under Heading Level 1 and can be adjusted as needed.

This template also provides guidance on how to apply paragraph styles for Heading Levels 1, 2, and 3, as follows:

- Labels such as “(Heading Level 2)” are included in this template only as a guide. These labels should not appear in your final manuscript.
- Style instructions are written in red font beneath each heading (e.g., “Use the Microsoft Word template style: Heading 2”) [1], [2], [3]. These instructions are for formatting reference only and must be deleted from your final manuscript.
- For paragraph text, use the style Microsoft Word template: *Paragraph (single spacing)*.

- Table and figure titles should be bold, use 8pt font size, and be placed above and centered over the table or figure. Example: Table 1. Description, Figure 1. Description. All figures must be high-resolution, clear, and easily visible.
- References and in-text citations must follow the IEEE citation style. It is recommended to use Mendeley to manage citations in your article [4].

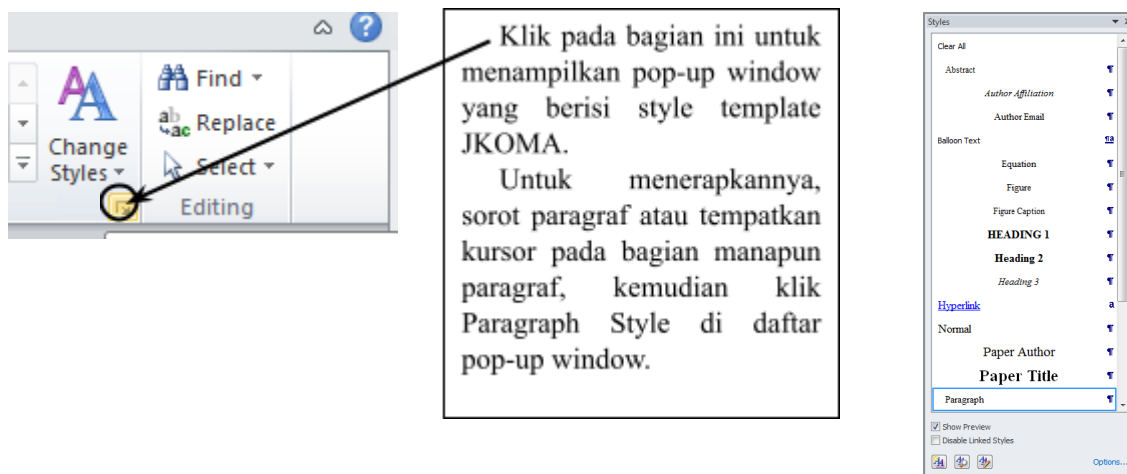

Important Note:

Do not include any headers, footers, or page numbers in your manuscript. All headers, footers, and pagination will be added by the JKOMA editorial team during the publication process .

How to Apply Paragraph Style (Heading Level 2, bold, 10pt)

(Use the Microsoft Word template style: Heading)

This section explains how to display the pop-up window to select a style:

How to Use the JKOMA Template (Heading Level 2, 10pt)

(Use the Microsoft Word template style: Heading 2)

You may delete or replace the contents of this template and insert your own figures or tables, as long as you continue to apply the appropriate styles from the style pop-up window. Make sure to remove all instructional notes or placeholder text from the template before submitting your article. Except for prepositions and conjunctions, the first letter of each word should be capitalized in the article title, as well as in Heading Level 2 and Heading Level 3. A new paragraph begins when you press the [ENTER] key. This section also provides basic formatting instructions for writing mathematical equations. All equations must use standardized mathematical symbols [5].

Formatting and Inserting Equations (Heading Level 2, 10pt)

(Use the Microsoft Word template style: Heading 2)

Equations must be center-aligned, with the equation number right-aligned (flush right). Below are some tips for writing equations according to the JKOMA template:

1. Copy, paste, and edit Equation (1) below (highly recommended).

2. Manually insert equations using the INSERT → OBJECT → Microsoft Equation 3.0 menu (it is recommended to insert equations using a two-column table, with the left column for the equation and the right column for the equation number).
3. Equation numbers must be arranged sequentially from top to bottom.

$$\frac{d[F_1]}{d\omega_2} = SAm_2 \cos \omega, \quad \frac{d[F_1]}{d\omega_3} = SAm_2 \cos \omega \tag{1}$$

Or Example

$(x + a)^n = \sum_{k=0}^n \binom{n}{k} x^k a^{n-k}$	(1)
-----------------------------------------------------	-----

*Remove the equation table borders, so that it becomes:

$$(x + a)^n = \sum_{k=0}^n \binom{n}{k} x^k a^{n-k} \tag{1}$$

If you are displaying multiple images, you can use a table to make the layout easier to manage.

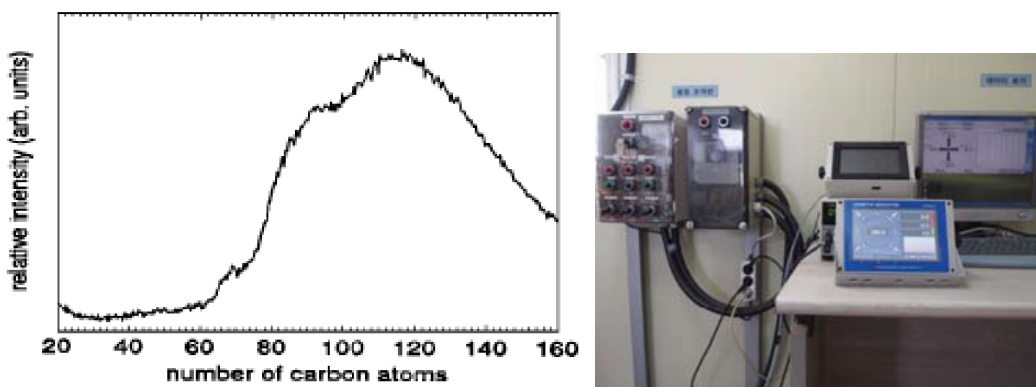

FIGURE 1. Use the Microsoft Word template style: Figure Caption. The text “**FIGURE 1.**” which serves as the label, must be written in uppercase and bold. If the figure consists of multiple parts, you may use labels such as (a), (b), and so on. Using a table makes it easier to arrange multi-part figures, as shown in the example above. (8pt)

To refer to a figure, use “FIGURE 1”. The figure caption should be placed below the image and center-aligned [6], [7], [8].

Tables

Below is an example of how to write a table, as shown in TABLE 1. Remove all vertical lines from the table.

TABLE 1. Use the Microsoft Word template style: Table Caption. The text “**TABLE 1.**” is the table label, written in uppercase and bold. The table caption should be center-aligned and placed above the table. (8pt)

Variable 1	Variable 2	Variable 1
Line 1	x	x
Line 2	x	x
Line 3	x	x

ARTICLE CHECKLIST TIPS (Heading 1, 12pt)

Here are some tips to help you perform a final check of your article before submitting it to JKOMA:

- Write your paper using the official JKOMA Template.
- Make sure to save the file in Microsoft Word 1997–2003 format.
- Ensure that your manuscript fully complies with the JKOMA template before submitting the journal.

ACKNOWLEDGEMENTS (Heading 1, 12pt)

Write your acknowledgements in this section [5]. For example: “We would like to thank the funding agency, institutions or individuals who supported the research, those who assisted in discussions, etc.” Author names must not be included in this section.

REFERENCES (Heading 1, 12pt)

JKOMA uses the IEEE referencing system. Please use Mendeley for citation management and ensure that the bibliography is also generated using Mendeley. In the reference list, arrange the entries in alphabetical order (ascending) based on the first author’s last name. Use the Reference style for formatting this section.
