Anna Aldric: Okay recording started suggest a brief recap today will likely be a quick meeting. Unless Santeria was able to join but if he is not I will be asking him to post and update directly into the open edx working group meeting notes section and We are waiting to see the outcomes of the user testing interviews that he's been holding and then from there will be able to get. The next iteration is what I'm hoping.

Anna Aldric: Also, FYI, there is an issue with the edit button on the LTI working group subgroup. I'm looking into that and hopefully we'll have that resolved within the week so that we can work there asynchronously

Anna Aldric: Naomi or Zach? any issues concerns anything that you wanted to raise and question for Naomi were you able to connect? with Santiago Over the course of the past two weeks.

Naomi Maekawa: Yeah, No. I actually didn't even try to talk to him.

Anna Aldric: Okay, no worries.

Naomi Maekawa: Sorry, yeah. the top of that I recently

Anna Aldric: So I'll

Anna Aldric: Thanks Zach. I'll connect you directly with him over slack if that's all right, Naomi. I had mentioned to him when he and I last talked that you would be a good resource to get the faculty and course author perspective. So I'd asked him to kind of interview you as a representative of that perspective.

Naomi Maekawa: okay.

Anna Aldric: So if it's all right with you, I'll just connect you directly.

Naomi Maekawa: Okay, thank you. That would be great.

Anna Aldric: awesome cool so I think on my end again, waiting to hear further updates. from that team, so I think I will be able to update this asynchronously as soon as we get the technical issues sorted out. And other than that there is no further action points for today.

Anna Aldric: And I say that Zach. Yeah. Thank you. Let me know if you are. Pulled in to offer the engineering perspective. Because I know that.

Anna Aldric: sometimes you was supposed to interview Scott in the meantime so from Your side as well. If you're someone that I can point them to for user testing rather. I think that'll be helpful.

Zach Hancock: Yeah, that just me.

Anna Aldric: Yes, that's you.

Zach Hancock: Yeah, I'm headed to do that.

Anna Aldric: Okay, perfect. So I think then action points for me is just connecting you both with him directly and then getting further updates asynchronously. So yeah.

Anna Aldric: I don't think there's anything further for today. So if anyone wants to hop out that is totally fine. I'll stay on for another five minutes in case I know that's caught sometimes appears late. So in case others join later, I'll stay on for a little bit. But if anyone wants to hop right now, that's totally okay.

Naomi Maekawa: All Thank you everybody.

Anna Aldric: Yeah, absolutely. Thanks Naomi. Bye.

Naomi Maekawa: Bye.

Meeting ended after 00:11:12 👋
