

Always You And I

V1

Caught a ride from Southern Maine
Left town like a hurricane
East coast highways only run you down the
drain
But I don't care
Any one's gonna make 'em pay

I prayed you'd leave with me
But you were just too scared to go
And I said I won't stay
And watch them them shake us

When I say goodbye
Put out my thumb
I thought to myself
That old man
Might be the one to break us

Chorus 1

But I'm so glad that I was wrong
It means that I can sing this song
It was always you and I

It took such a long time to forgive
a lesson that I try to live
broken birds learn how to fly
It was always you and I

V2

We made it ten more years til I
became unraveled and untied
And I remember how we cried into the night
for the love we felt and the peace we
couldn't find

You were the best of me
a prize I couldn't leave behind
so in my heart
I hid you like a treasure

It was the rest of me
A quarry I just had to mine
to know the world
belonged to me forever

Chorus 2

I knew somehow I'd find my way
We'd live to fight another day
It was always you and I

No matter where the road would lead
If I should fail, if I succeed
I'd return with open eyes
It was always you and I

Bridge

F

G

I don't believe in happy endings
And I don't believe in meant to be
but I believe in you
and you believe in me

C

and together we are stronger than
we ever figured we could be

Chorus 3

You're my companion, my best friend
You're where my days begin and end
it was always you and I

I need you like the air I breathe
I'm burning bright as kerosine
I'm so happy that you're mine
it was always you and I
