### About Us

As always our doctors make the final determination if the individual is a good candidate for an implant.

Your initial evaluation will include an examination of your mouth and teeth and a thorough review of your medical and dental histories. Various X-Rays scans of your mouth.

This will provide information on the amount of bone in your jaw, its shape and where the nerves and sinuses are. Finally, Our dentists will discuss the options available to you, its cost and possible complications and post operative care.

Our dentist will work with you to develop a treatment plan for your needs and preferences. Implant therapy in [Albany Dental](#) involves a team of 2 doctors; an Oral Surgeon or Implant Specialist who will surgically place the implant(s), and a Restorative Dentist that makes the crowns, bridges, and dentures that the implant or implants will support.

We at [Albany Dental](#), offer a free consultation to see if you qualify for an implant. Our doctors, have placed and restored hundreds if not thousands of implants, so rest assured, you will be with the best professionals in the business.
