/trash/ Board's Own Writing General

- /wfg/ [Masterbin](#) (This document.)
- Past [Threads](#) List.
 - The traditional archive [search](#), while doable, is hit and miss plus thoroughly intermixed with unrelated threads.
- Other Useful Places
 - /Collared/ [Masterbin](#)
 - /HMoFA/ [Masterbin](#)
 - /wfg/ [bunker](#) thread for 4chan downtime.

We urge you to consider posting a link to your story/green text on a hosting site instead of dumping text in-thread (pls!). Use [rentry.org](#) if nothing else.

Once the active thread 404s /wfg/ will be relaunched every Wednesday if no one else does so before then.

For questions and comments regarding this Masterbin please drop them in the active /wfg/ thread on /trash/.

Writing Tools

Various apps and software recommended or mentioned in the general.

- [Emacs](#)
 - Old School from the dawn of word processors.
 - Configuration and function key combinations are weird if all you've ever known are modern standards and conventions.
- World Building Apps.
 - Prone to snaring beginners with world building disease, encouraging one to do all but write the damn story.
 - [World Anvil](#)
- [Focus Writer](#)
 - Provides plenty of pleasant customization to encourage you to write.
 - Philosophically, so does a blank piece of paper.
- Modern Office Applications
 - All have the disadvantage of being huge software blobs and feature bloat.
 - [Microsoft Office](#) (\$\$\$ up or GTFO!)
 - [LibreOffice](#)
 - [OpenOffice](#)
- [Ellipsus](#)
 - Good replacement for Google Docs and has an [Ao3](#) export system.
 - Spellcheck is functional but basic. No offline mode.
- [Proof.py](#)
 - Python script for automating an LLM grammar check via Gemma-4.

Historical Notes

Originally this document was known as “/d/’s Story/Master List.” Is that what you were looking for? You found it. Of course, much has changed. The general this document serves today originated from various places, not just 4chan’s /d/ board. Everything migrated over to /trash/ and /wfg/ has been a part of /trash/ board culture for years, even before /d/ writethreads were kicked out.

The /wfg/ thread as it stands now is devoted to the art of fiction writing and is **not** /d/ specific, nor any particular fetish specific. Nor is it either SFW or NSFW exclusive.

Much of the content from the original document dates to 2014 and earlier. In that era, IRC was still a thing, and the original Pastebin service was a popular and useful means for sharing stories. This is reflected in many of the remaining legacy links, but don’t take them as an endorsement. Today, Pastebin is hostile to adult content, and censorship prone. Many of the writing guides and tip links were dead, although the contents were moved elsewhere, or otherwise saved by dedicated anons. They lived on through various general threads sharing a taste for writing.

Few of the original gaggle of art and artist galleries survived to today. Much of the art was /d/ and /tg/ specific to that era as well. Both /d/ and /tg/ have undergone significant changes and cultural shifts. Our historical collection of stories and art are not reflective of the current /trash/ based general either, but no matter. What could be saved has been saved.

So. Today. LLMs and AI? [Long live the new flesh!](#)

For lack of anything easier as a simple storage medium, [the last backup](#) of the original /d/ Story/Master List Google Doc can be found in our 8chan.moe bunker thread. Note: a direct link to the specific file is a bad idea for various reasons. Don’t abuse 8chan.moe.

And finally, here are some [Historical Pages](#) from the earlier document.
