

this file was corrupt because had to use crap libre writer on ubu.  
something with TOC wass messed up.  
think i fixsed it.

NOTE: dont run mavproxy at same time. screwsup the ports.

!! Nano succesfully switchs Pixhawk 6c modes between RTL and Land !!!

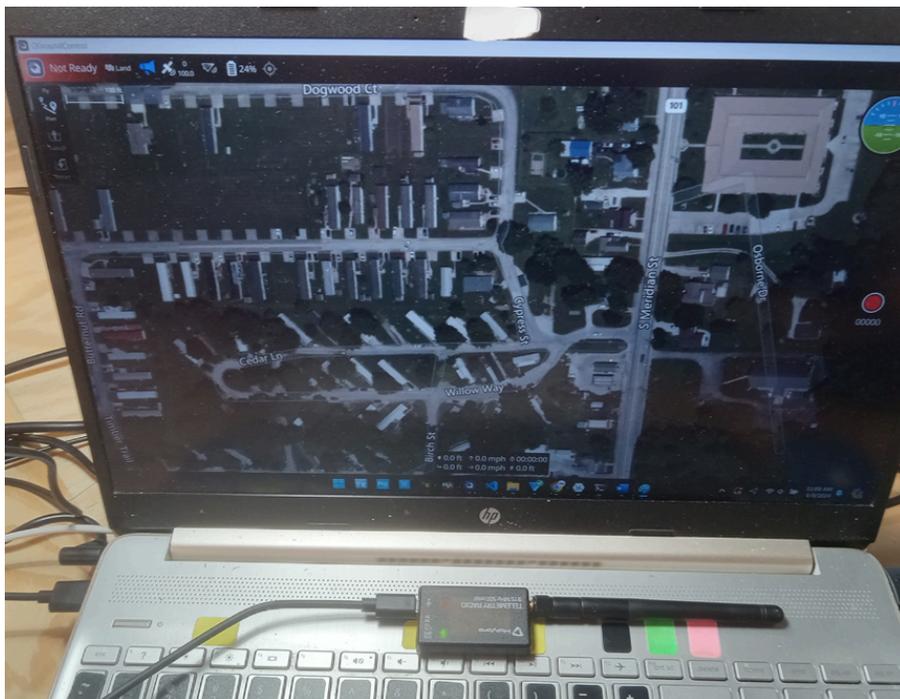

screenshots from win11, connection via holybro telem radios win11<>pix6c

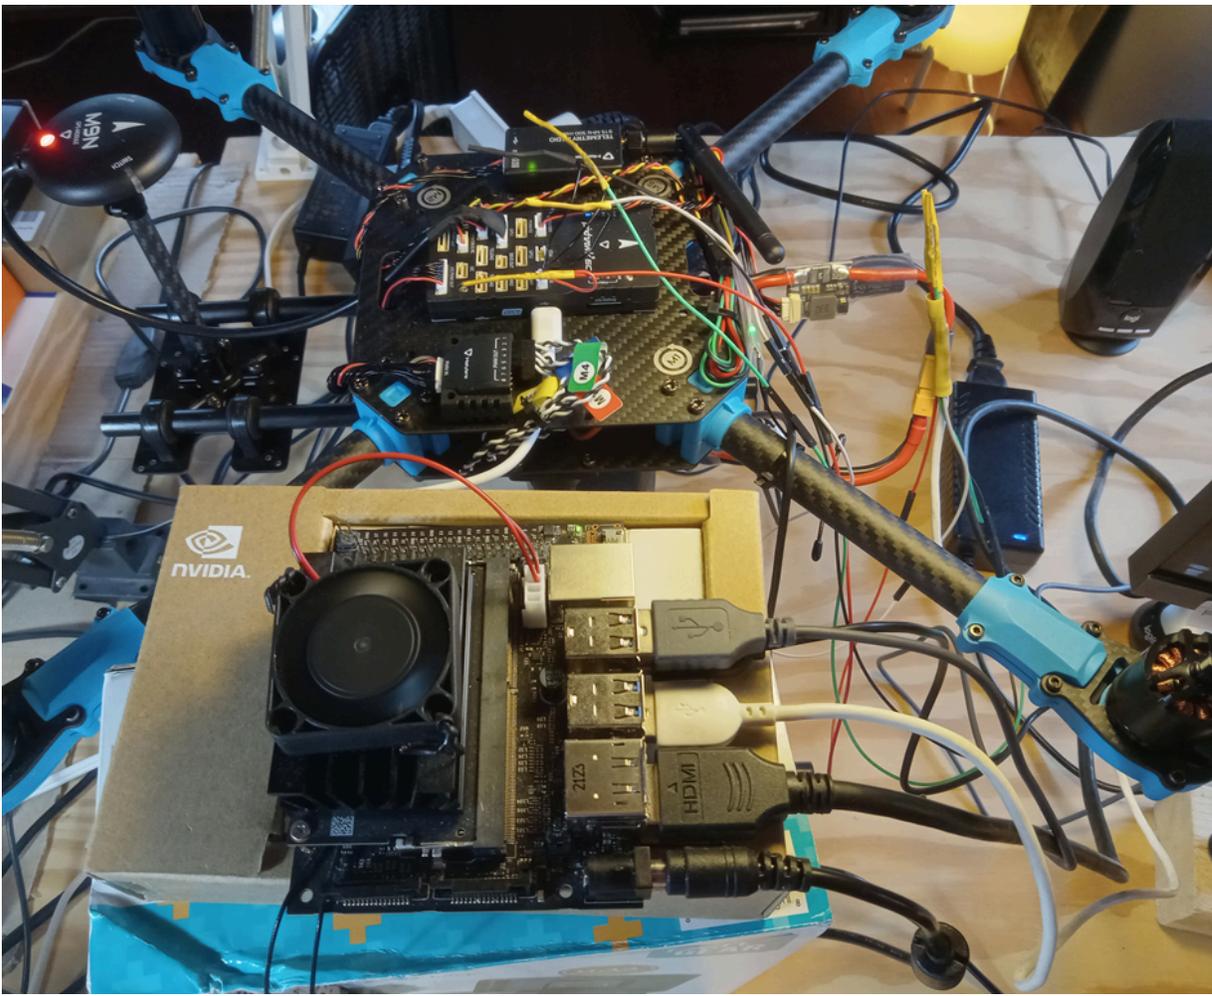

general setup

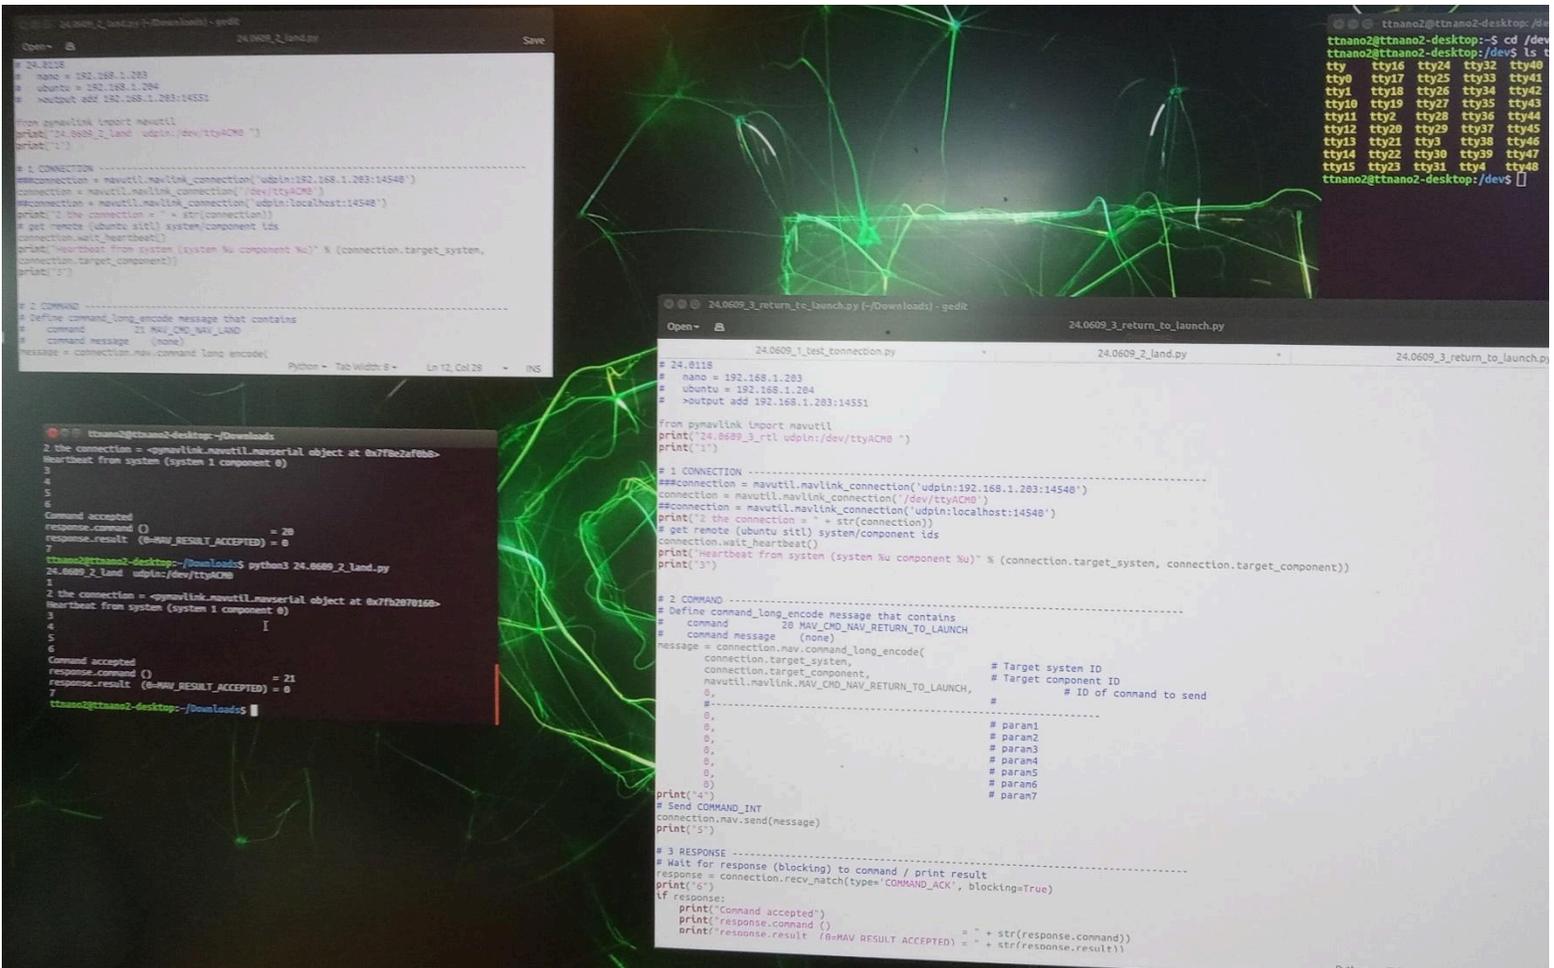

qgc connection by wireless

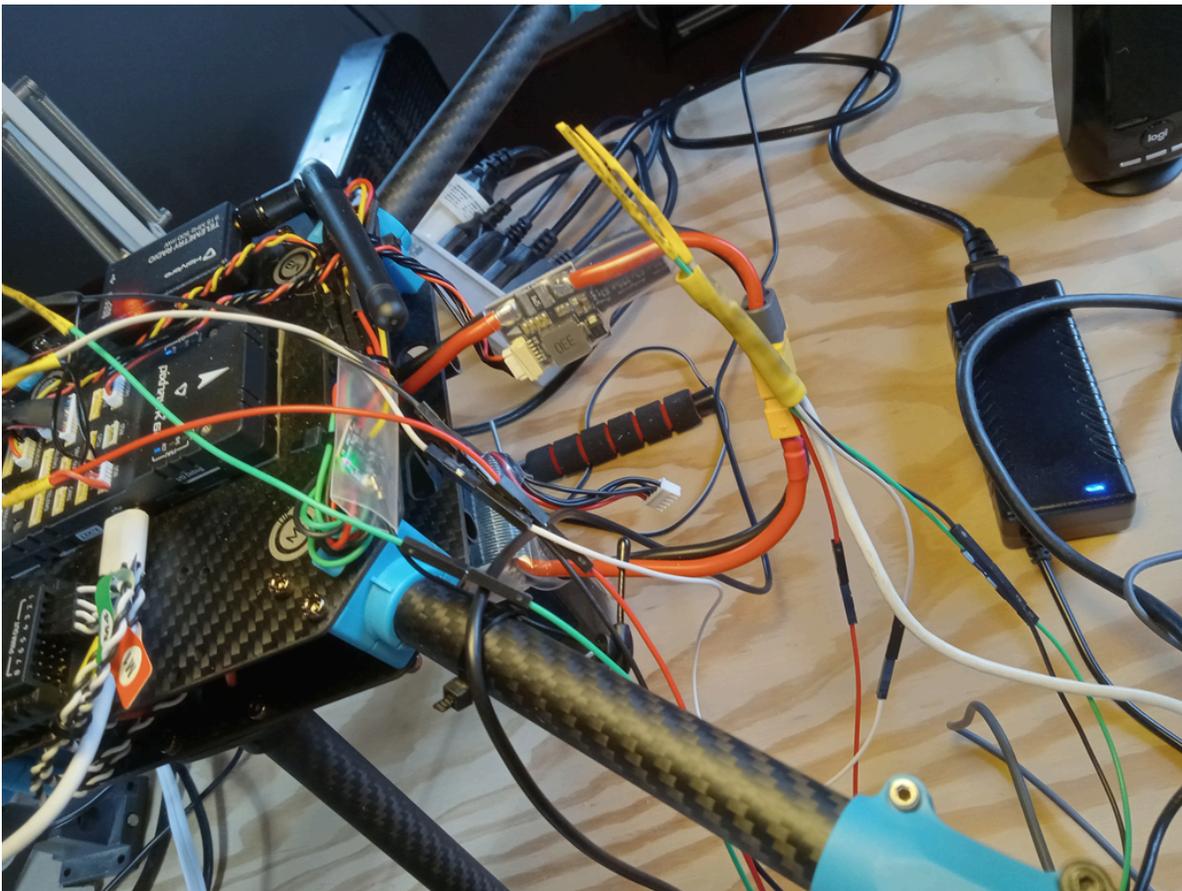

6c powered by battery, jnano connect to ttl\_usb

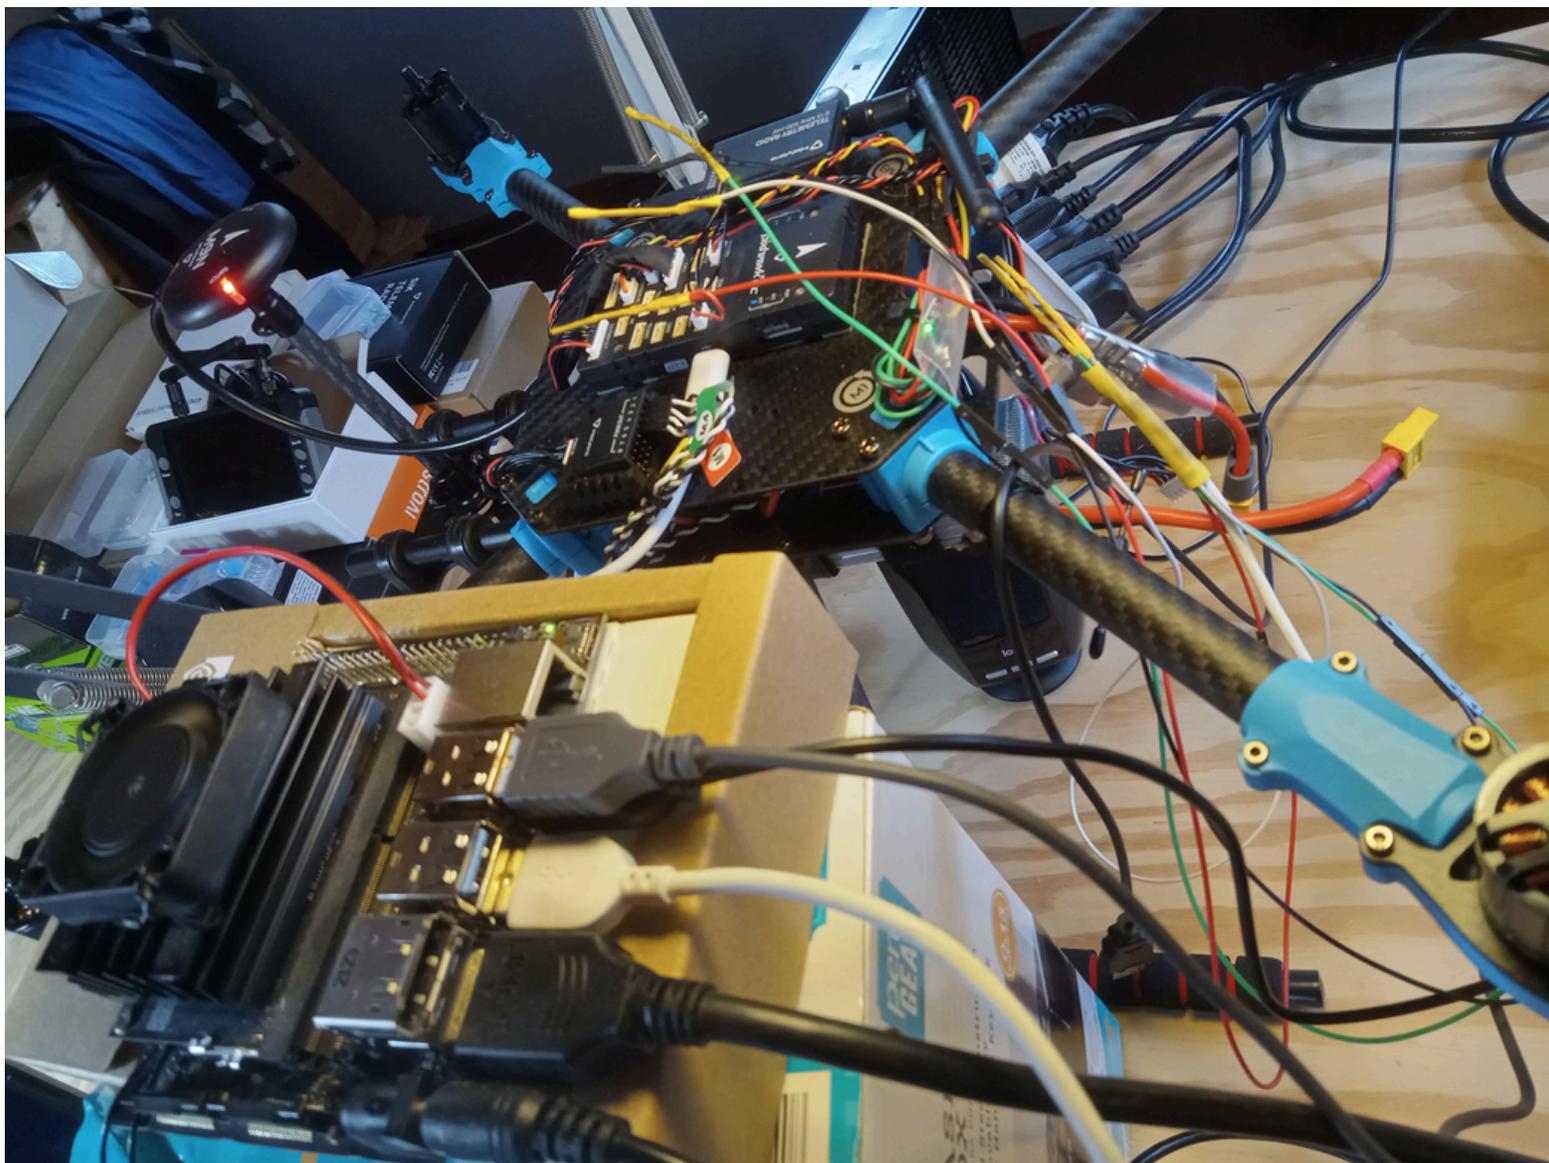

performed land, rtl , back and forth

closeup

can disconnect battery and soemtimes 6c will run on usb\_ttl power for a whie... not predictable

try to do same command twice thats a problem

```
