

Integrating Canva into Canvas

Canva and Canvas are not only very close in their names, they are also great friends! They are working together to make creating and submitting assignments as easy as taking candy from a baby who is asleep and doesn't like candy. It's a snap of cake you can do in your sleep with your hands tied behind your back. It's not rocket surgery!

Canva is not currently using the External Tool feature in Canvas at this time, but they do have a great Online Submission type workflow!
